1.1 FOREWORD

This document is intended to be used as a reference for the implementation of AL BASRA AL RAEDA COMPANY 's Health, Safety, Environmental & Quality Management System (Q&HSE MS).

The following sections contain details of elements which comprise the Company's Q&HSE MS. Each section is numbered separately and is intended to provide information and guidance for correct implementation of the Q&HSE MS.

The management of **AL BASRA AL RAEDA COMPANY** recognizes the importance of effective Q&HSE control in a modern business environment. It is further acknowledged that previous strategies for control of Q&HSE tended to rely on external stimuli and were only effective after events had occurred.

In order to demonstrate firm commitment to Q&HSE management system and further develop the previous safe performance record of the Company, it is intended that the Company adopt a pro-active approach to all Q&HSE related matters.

The Company intends that its operations whether Onshore or Offshore will be carried out in full compliance with relevant Legal and Industrial Standards including those set out in clients' contractual agreed documentation.

In order to achieve the objectives, set for this Q&HSE MS, **AL BASRA AL RAEDA COMPANY** will make certain that all Employees and Contractors are informed of their responsibilities and of the requirement to actively participate and co-operate with management in support of the implementation of this Management System.

The Company further recognizes the importance of positive demonstration of commitment by management. Demonstration of commitment to Q&HSE matters will be shown through the participation, application and involvement in the practical compliance of the Company's Q&HSE Policy and Objectives.

Every Manager, Site manager and Supervisor shall accept their individual responsibility for Q&HSE matters and treat them with the same level of importance as other business matters.

Managing Director

CLAUSE ONE:

1.2 SCOPE & APPLICATION

1.2.1 GENERAL

This document specifies the Health, Safety, Environment and Quality Integrated Management System of AL BASRA AL RAEDA COMPANY

The systems requirements of this manual are aimed at achieving customer / Client satisfaction by consistently providing conforming product / service and meeting or exceeding customer and applicable regulatory requirements through application of the system, continual improvement and the prevention of nonconformity.

This document ensures that the company adequately identifies customer requirements, through all Quality Management System processes, to achieve customer satisfaction with a closed-loop Process Model methodology.

This document applies to below mentioned products/services categories and satisfies the Q&HSE MS requirements as required in ISO 14001:2015, ISO 45001:2018, and ISO 9001: 2015.

COMPANY OVERVIEW

Since the company establishment, the Company has grown steadily depending on consistency, expertise, professionalism, quality service and customer support.

Controlled growth is an important aspect of BLC corporate philosophy, allowing the Company to maintain continuity and highest level of customer service.

BLC is a well known by its commitment to providing quality service and working closely with its clients.

Extensive abilities with proven experience for design, detailed engineering, fabrication, installation, commissioning, maintenance in the previously mentioned disciplines, qualifies BLC as a dependable partner-in-success.

CAPABILITIES SUMMARY

The company takes pride in its highly experienced administrative and engineering team, with over 20 years of expertise in executing civil and construction works. Additionally, our technical staff brings over 25 years of experience in managing and executing large-scale projects

ACTIVITIES (FIELDS OF INTEREST)

BLC is responsible to clients to act always in a professional manner and to focus on doing what is "right for the project" (within the constraints placed on BLC by the client).

CLAUSE TWO:

1.2.2 NORMATIVE REFERENCES

The following referenced document is indispensable for the application of these specifications of:-

- A) ISO 9000, Quality management systems—Fundamentals and vocabulary
- B) ISO 9001: 2015 Quality Management System
- C) ISO 45001:2018 Occupational health and safety management systems Requirements
- D) ISO 14001:2015 Environmental management systems Requirements.

1.2.3 PERMISSIBLE EXCLUSIONS/ EXCEPTIONS

The Company shall adopt the exceptions and provide substantive justifications to clarify the exception reasons, the non-conformity of the company's work nature and the excluded items must be taken into consideration.

Sr. #	Reference No. As per the Specification	Exceptions	Justifications

CLAUSE THREE:

1.3 TERMS, DEFINITIONS AND ABBREVIATIONS

1.3.1 Terms, Definitions **Company:** AL BASRA AL RAEDA COMPANY

QHSE: Quality & Occupational Health, Safety, Environment.

Occupational Health & Safety : Conditions & Factors that affect the wellbeing of employees, temporary workers, contractors, personnel, visitors & any other person in the work place.

Safety: Safety encompasses the Systems, Programs, Procedures, and practices required for the prevention of incidents.

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 14 of 109

Environment : Surroundings in which an organization operates, including air, water, land, natural resources, flora, fauna, humans and interrelation.

Quality: Degree to which a set of inherent characteristics fulfill requirements.

Quality Service: Adequacy of service provided to clients in achieving their present and future objectives.

Quality Assurance Part of quality management focused on providing confidence that quality requirements will be fulfilled.

Quality Management Coordinated activities to direct and control an organization with regard to quality.

System: A management tool for meeting an established objective made up of four steps i.e., Plan, implement, measure and adjust.

Quality Management System: Management system to direct and control an organization with regard to quality.

IMS: Integrated Management System - The Company structure, responsibilities, practices, procedures, system processes and resources for implementing IMS, Health, Safety, and Environment & Quality Management System.

IMS Policy (Q&HSE) A statement endorsed by the GM (company senior management) of the intentions and principles of actions regarding the Health, Safety, Environmental & Quality effects and which gives rise to strategic and detailed objectives.

Practice Accepted methods or means of accomplishing stated tasks.

Program A Program is a management tool for meeting an established Objective that is less comprehensive than a System. It composes of two steps, planning and implementation. It usually addresses issues that have either limited scope or limited time frame.

Training: Training encompasses the steps necessary to ensure that employees have the knowledge, skills and values necessary to fulfill their environmental, health and safety responsibilities.

Integrated Management System Manual (IMS)

Code

00

Date

17/01/2026

Page 15 of 109

Hazard: An object, physical effect, or condition with potential to harm people, property, or the environment or effect on the company reputation.

Risk The product of the chance that a specified undesired event will occur and the severity of the consequences of the event.

QHSE Audit: An independent, systematic and documented process of objectively obtaining and evaluating verifiable evidence to determine:

Whether the IMS and its results conform to the Q&HSE Audit Criteria. Whether the system is implemented effectively.

Whether the system is suitable to achieve the Health, Safety, and Environmental & Quality Policy and Objectives

Non-Conformance: A deviation from a requirement specified in the Safety Management System, or an error, which could endanger the safety of the people, asset integrity, environment, the vessel or its cargo.

Self-Assessment: A process whereby a check is carried out by a unit or facility to determine how well its programs and procedures satisfy legal requirements and conform to the expectations of the Q&HSE MS.

Shall, Will, Must: Means that the action mentioned is compulsory.

Should, Would: Means that the action mentioned is not compulsory but is recommended.

Unsafe Act: Any act that deviates from a generally recognized safe way or specified method of doing a job and increases the potential for an accident.

Near Miss: Any event which had the potential to cause injury and/or damage and/or loss, but which was avoided by circumstances.

Incident : An event or chain of events which has caused or could have caused injury, illness and/or damage (loss) to assets, the environment, company reputation or third parties.

Waste Management: Waste Management encompasses the assessment and disposal of waste generated by facilities (vessels + onshore base) with the goal of minimizing and preventing the generation of waste.

Integrated Management System Manual (IMS)

Code

Revision

00

Date

17/01/2026

Page 16 of 109

Acceptance criteria: Specified limits of acceptability applied to process or product characteristics.

Acceptance inspection: Demonstration through monitoring or measurement that the product conforms to specified requirements.

Calibration: Comparison to a standard of known accuracy and making any needed adjustment(s).

Collection: Process of obtaining, assembling, and/or organizing applicable information with the intent of meeting the requirements of Clause 4.5. Control of Record

Compliance: Act or process of satisfying the legal and other applicable requirements of a regulation or regulatory body.

Critical : That deemed by the organization, product specification, or customer as mandatory, indispensable or essential, needed for a stated purpose or task, and requiring specific action.

Delivery: Point in time and physical location at which the agreed transfer of ownership takes place.

Design acceptance criteria DAC: Defined limits placed on characteristics of materials, products, or services established by the organization, customer, and/or applicable specifications to achieve conformity to the product design.

Design validation: Process of proving a design by testing to demonstrate conformity of the product to design requirements.

NOTE Design validation can include one or more of the following (this is not an all-inclusive list):

- a) Prototype tests,
- b) Functional and/or operational tests of production products,
- c) Tests specified by industry standards and/or regulatory requirements,
- d) Field performance tests and reviews.

Design verification: Process of examining the result of design and development output to determine conformity with specified requirements.

NOTE Design verification activities can include one or more of the following

(This is not an all-inclusive list):

- a) Confirming the accuracy of design results through the performance of alternative calculations,

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 17 of 109

- b) Review of design output documents independent of activities of design and development,
- c) Comparing new designs to similar proven designs.

First article

Representative sample of a product, component, or output from a process used to verify that prescribed activities have satisfied the requirements as specified by the organization.

Key performance indicator KPI:

Quantifiable measure that an organization uses to gauge or compare performance.

Legal requirement:

Obligation imposed on an organization, including those that are statutory or regulatory.

Manufacturing acceptance criteria MAC:

Defined limits placed on characteristics of materials, products, and services established by the organization to achieve conformity to the manufacturing or servicing requirements.

Outsource [outsourced activity]:

Function or process that is performed by an external supplier on behalf of the organization.

Preventive maintenance:

Planned action to minimize the likelihood of equipment failure and unscheduled interruptions to planned events

Procedure:

Organization's documented method and written description for performing an activity under controlled conditions to achieve conformity to specified requirements.

Risk:

Situation or circumstance that has both a likelihood of occurring and a potentially negative consequence.

Service:

Performance of an activity by one function or organization for another.

Service Quality Plan:

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 18 of 109

Document that establishes procedures, resources, processes, and any required sequence of activities identifying and controlling the quality requirements.

Servicing:

Product maintenance, adjustment, repair, and/or on-site installation when installation is required by applicable product specifications.

Service-related product:

Materials, equipment, and software used in the execution of a service.

Interested parties

Stakeholder person or organization that can affect, be affected by, or perceive itself to be affected by a decision or activity

For example Customers, owners, people in an organization, providers , bankers, regulators, unions, partners or society that can include competitors or opposing pressure groups.

Supplier

External provider that is not part of the organization which provide products, Processes, service and / or service related products.

EXAMPLE Producer, distributor, retailer or vendor of a product or a service

Documented information

Information required to be controlled and maintained by an organization and the medium on which it is contained

Note 1: Documented information can be in any format and media and from any source.

1.8 IMS POLICY

We, AL BASRA AL RAEDA COMPANY; one of the major companies for providing world class services in Oil & Gas sector.

It is our policy to meet all legislative commitments, implement and execute licensed activities to the satisfaction of customers and contracting parties.

For the successful implementation of this Integrated Management system is requested to demonstrate its commitment to improve Quality, Occupational Health and Safety and Environmental performance by actively and visibly participating in the implementation of the International Standards: ISO 9001 (Quality), ISO 14001 (Environmental) and ISO 45001 (Occupational Health & Safety),

All hazards impacting on Health, Safety and the Environment (HSE) must be identified on a continuing basis, listed, evaluated and then improvement measures taken by each department. Suggestions for improving the system are encouraged and welcomed from every employee.

It is our policy to minimize injuries and ill-health of company employees, stakeholders, contractors and minimize environmental pollution caused by activities, services and operations. It is policy to progressively reduce the impacts of company operations on the environment by reducing emissions, effluents/discharges and waste and improving the efficient use of natural resources and energy.

AL BASRA AL RAEDA COMPANY is committed to taking all measures to assure and improve the quality of its services, and products achieve a competitive and high degree of quality performance to meet the present and future requirements of the accreditation bodies and exceed expectations of our clients

The policy is also to fulfil or exceed our customers' expectations through clear roles and responsibilities for continuously improving services and maintaining improvement in Quality and HSE management performance through regular self-assessment to reduce all risks to an acceptable level.

Measuring improvement will be considered an essential part of company objectives and AL BASRA AL RAEDA COMPANY is fully committed to exerting its utmost efforts on a continuing basis to improve the quality of the technical, managerial and customer-related aspects of our business.

This policy is available to all relevant parties, clients, stakeholders and is based on the conviction that all our quality, health safety and environmental objectives have equal status with other primary business objectives and will contribute to the overall efficiency and success of the company.

2.1 CLAUSE 4: CONTEXT OF AL BASRA AL RAEDA COMPANY

2.1.1 UNDERSTANDING THE ORGANIZATION AND ITS CONTEXT

AL BASRA AL RAEDA COMPANY has reviewed and analyzed key aspects of itself and its stakeholders to determine the strategic direction of the company. This requires understanding internal and external issues that are of concern to International Oil & Gas companies, Service providers, State entities and its interested parties (as per 2.1.2 below);

These issues arising from legal, technological, competitive, market, cultural, social and economic environments, whether international, national, Regional or local.

AL BASRA AL RAEDA COMPANY monitors and updates such issues as appropriate, also these issues are also discussed in the management reviews meetings.

2.1.2 UNDERSTANDING THE NEEDS AND EXPECTATIONS OF INTERESTED PARTIES

The issues which are determined as per 4.1.1 above are identified through an analysis of risks facing AL BASRA AL RAEDA COMPANY and its interested parties such as:

AL BASRA AL RAEDA COMPANY Customers (such as but not limited to International Oil & Gas companies, Service providers, State entities, etc....) requirements, Training Requirements, AL BASRA AL RAEDA COMPANY owners, AL BASRA AL RAEDA COMPANY employees, AL BASRA AL RAEDA COMPANY external providers, regulators such as Iraqi Legal and statutory, international requirements and / or other states as applicable requirements, unions, partners or society that can include competitors or opposing pressure groups.

AL BASRA AL RAEDA COMPANY continuously monitors and reviews all the information of those mentioned interested parties and their requirements.

AL BASRA AL RAEDA COMPANY demonstrates its ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements, and aims to enhance customer satisfaction.

All these information are then used by senior management to determine the company's strategic direction. This is defined in records of management review, and periodically updated as conditions and situations change.

3.1 INTEGRATED MANAGEMENT SYSTEM STRUCTURE

AL BASRA AL RAEDA COMPANY Integrated Management System is comprised of a number of different elements.

3.1.1. Statements of: **Quality policy: BLC- IMS-QC/QA-POLICY**

HSE Policy: BLC- IMS-HSE-POLICY

Driving Policy: BLC- IMS-DR-POLICY

Drug and Alcohol Policy: BLC- IMS-D&A-POLICY

ENVIRONMENT-POLICY: BLC-IMS-ENVIRONMENT-POLICY

Procurement Policy: BLC-IMS-PR-POLICY

3.1.2. Integrated Management System: IMS Manual BLC-IMS-MAN

The IMS Manual provides an overview of the Health, Safety, Environment and Quality Management System of AL BASRA AL RAEDA COMPANY and includes:

A) The key elements of the IMS, the scope of The IMS including justification for any exclusions to specific quality management system elements.

AL BASRA AL RAEDA COMPANY exclude the Design process for API 7-1, API 6A and API 5CT because these API products have their own standard design so there is no need to include it.

B) A description of the sequence and interaction between the processes and their interaction as well as the structure of the system. It provides details on how the system complies with the requirements of the **ISO 9001:2015, ISO 14001: 2015 and ISO 45001: 2018**, Identification of processes that require validation; and reference to documented procedures that control the quality management system processes (as per BLC-IMS-LD list of procedures & working instructions).

C) Identification of legal and other applicable requirements to which the AL BASRA AL RAEDA COMPANY claims QMS compliance that are needed to achieve product conformity such as:

a) Iraqi Legal and statutory requirements and / or other states as applicable requirements;

b) International technical standards (such as API, DS1, ASME, ASTM etc...

c) Clients Requirements such as ROO (Rumaila Operating Organization), ENI, EXXONMOBIL, LUKOIL, PETROCHINA, ANTONOIL, MAJNOON, CNOOC, SCHLUMBERGER, IDC, BGC, SHELL, Halliburton etc...

d) Training Requirements.

Integrated Management System Manual (IMS)

Code

Revision

00

Date

17/01/2026

Page 35 of 109

The IMS manual is prepared and issued by the IMS Manager, reviewed by the Q&HSE Manager and by all Divisions Managers & finally approved by the Managing Director.

3.1.3. Q&HSE /IMS PROCEDURES

The Q&HSE IMS procedures provide details on how the key elements of the IMS are implemented. These procedures are consistent with the requirements of the standards and AL BASRA AL RAEDA COMPANY policy for Health, Safety, Environment and Quality. All general procedures as per BLC-IMS-LD list of procedures.

All Quality and technical Procedures (**BLC-IMS-P XXX**) are prepared and issued by the IMS Manager, QA Manager and Department head Managers, reviewed by the Management system general and/or the QA/QHSE Manager then finally approved by the MD.

All Health and safety Procedures (**BLC-HSE-PXXX**) are prepared and issued by the IMS Manager, HSE Manager and Department head Managers, reviewed by the Management system general and/or the QA/QHSE then finally approved by the MD.

3.1.4. WORK INSTRUCTIONS

The Work Instructions shall be identified for quality (**BLC-IMS-WI -XXX**), for HSE (**BLC-HSE-WI XXX**) further amplify procedures by defining step-by-step how specific activities are to be carried out.

3.1.5. Standard Forms and Checklists

Forms and checklists shall be identified: For quality (**BLC-IMS- P XXX -F XXX / BLC-IMS-CAL-F XXX / BLC-IMS-LFT-F XXX**), for HSE (**BLC-HSE- P XXX -F XXX / BLC-HSE-CAL-F XXX / BLC-HSE-LFT-F XXX**).

To provide objective evidence of compliance to the Health, Safety, Environment & Quality System data needs to be recorded; this is done on various formats /forms & checklists. A sample of each form/format and checklist is retained behind the relevant procedure for guidance on how to complete it, wherever applicable.

In general numbering of procedures are as above and detailed as below.

BLC / Quality Management System / Procedure or Work Instruction or Form/ Sequence number.

Specifications, drawings and sketches as appropriate will complement the above documentation

3.1.6. EXTERNAL DOCUMENTATION

Integrated Management System Manual (IMS)

Code

CLAUSE 6 - PLANNING

4.0.1 ACTIONS TO ADDRESS RISKS AND OPPORTUNITIES

When planning for the quality management system, AL BASRA AL RAEDA COMPANY considers the issues referred to in 2.1.1 and the requirements referred to in 2.1.2 and determine the risks and opportunities that need to be addressed to: Give assurance that the quality management system can achieve its intended result(s); enhance desirable effects; prevent, or reduce, undesired effects and finally to achieve improvement.

AL BASRA AL RAEDA COMPANY plan:

- A) Actions to address these risks and opportunities;
- B) How to integrate and implement the actions into its quality management system processes and evaluate the effectiveness of these actions.

All Actions taken to address risks and opportunities shall be proportionate to the potential impact on the conformity of products and services.

NOTE 1 Options to address risks can include avoiding risk, taking risk in order to pursue an opportunity, eliminating the risk source, changing the likelihood or consequences, sharing the risk, or retaining risk by informed decision.

NOTE 2 Opportunities can lead to the adoption of new practices, launching new products, opening new markets, addressing new customers, building partnerships, using new technology and other desirable and viable possibilities to address AL BASRA AL RAEDA COMPANY's or its customers' needs.

The documentation structure defines how the requirements for Integrated Management System (IMS) will be met. Quality Plan shall be developed, maintained and controlled for major jobs whenever necessary, which shall detail the process, documents and responsibilities required to provide correct service against any given customer specification/ requirement.

This generic plan also identifies all the processes required for the effective implementation of the IMS along with their sequence & interactions. Suitable monitoring/verification points in the processes are identified along with the standards of acceptability for all activities and a recording system.

Additionally, each component of particular project/service is planned prior to commencing the work. The need for extra equipment, resources, and skills is considered and documented as part of planning such individual project components. For each project, project-specific plan will be developed to supplement the standard & generic IMS Plan.

If the customer requires additional or specialized quality related operations to be performed, which are not specified in the generic one, then a specific quality plan shall be produced for that particular contract or order.

Date

17/01/2026

Page 42 of 109

All the quality plans whenever necessary will be documented, reviewed and approved by designated quality and operation personnel, thus maintaining the integrity of the Quality Management System.

The top management is responsible to ensure that the integrity of the Integrated Management System is maintained when changes to the system are planned & implemented.

4.0.2 PLANNING OF PRODUCT REALIZATION AND /OR SERVICE AND SERVICE-RELATED PRODUCT PROVISION

AL BASRA AL RAEDA COMPANY identifies and plans the processes and documents needed for product realization and the execution of services or provision of service-related products.

Planning of product realization and the execution of services or provision of service-related products shall be consistent with the requirements of the other processes of the quality management system.

In planning, AL BASRA AL RAEDA COMPANY shall address the following:

- A) Required resources and work environment management determining the resources needed to achieve conformity to the Product or Service and service-related products requirements;
- B) Establishing criteria for the processes and the acceptance of the Products or Services and service-related products
- C) Product and /or service and service-related product requirements
- D) Customer-specified requirements;
- E) Legal and other applicable requirements;
- F) Contingencies based on risk assessment;
- G) Design and development requirements;
- H) Service and/or service-related product design;
- I) Implementing control of the processes in accordance with the criteria required verification, validation, monitoring, measurement, inspection, and test activities specific to the product and the criteria for product acceptance.
- J) Management of change (MOC); and
- K) Records needed to provide evidence that the product realization processes meet requirements.
- L) Key performance indicators;
- M) The output of planning shall be documented and updated as changes occur. The plans shall be maintained in a Structure suitable for AL BASRA AL RAEDA COMPANY 's method of operations.

Q&HSE committee meetings, both formal and informal, will be held at regular intervals throughout the year. Management review meetings and others shall facilitate two-way communication to enhance IMS effectiveness. All customer requirements and legal and other applicable requirements are communicated at relevant levels within the organization.

Regular Operations meetings shall be held and documented as per Minutes of Meeting form in order to enable closer co-ordination between the ORGANIZAION's different departments.

Follow up actions and feedback reports will be distributed to all relevant personnel to enable an information cascade to be formed.

Use of corrective and preventive action processes to report nonconformities or suggestions for improvement

Use of the results of the internal audit process

Use of Internal emails, memos to employees.

Provision of internal awareness training to all employee regarding to QHSE.

All customer requirements and legal and other applicable requirements are communicated at relevant levels within AL BASRA AL RAEDA COMPANY

Toolbox talks are to be conducted on a daily basis by worksite Supervisors, Team Leaders or Operators while encouraging two-way discussions. Topics to be covered are to include information and instructions:

- ❖ Objectives of Job
- ❖ Plan and Procedures
- ❖ Responsibilities / Supervision
- ❖ HAZARDS
- ❖ Manpower and Skills required
- ❖ Equipment to be used
- ❖ Personal Protective Equipment
- ❖ Special controls – Permit to Work (PTW BLC-HSE-P003) etc.
- ❖ Worksite environment
- ❖ Other relevant/specific information
- ❖ Access and Exit
- ❖ Other information

Managers and Supervisors will assess personnel for their involvement, participation and demonstration of commitment to the implementation and development of the Q&HSE MS.

A Q&HSE award Scheme will be used to reward selected individuals who have shown outstanding performance during their work activities. Awards for Q&HSE performance will be made for monthly as well as for annual performance appraisals.

CLAUSE 8 – OPERATION

5.1 OPERATIONAL PLANNING AND CONTROL-

Planning process starts usually at the end of each year where all company's departments shall setup an outline for next year activities according to the following:

- Determine the tasks and objectives for the next year.
- Develop the necessary plans and programs to execute the work.
- Prepare all the requirements to achieve a qualified product.
- Documented procedure preparation for databases analysis to verify the product provided quality.
- Organize records to demonstrate the operations and provided products quality compatibilities.
- Ensure that the planning process outputs conform to the working methods.

5.2 REQUIREMENTS FOR PRODUCTS AND SERVICES

AL BASRA AL RAEDA COMPANY has determined and implements effective arrangements for communicating with customers in relation to requirement for products & services that includes but not limited to service information, enquiries, contracts or order handling, including amendments, and Customer feedback, including customer complaints.

AL BASRA AL RAEDA COMPANY has defined processes for communicating effectively and efficiently with its customers and other interested parties and processes for collecting and analyzing the data related to customer satisfaction.

AL BASRA AL RAEDA COMPANY implements and maintains processes to ensure adequate understanding of the needs and expectations of its interested parties, and for translation into requirements for the organization.

These processes include identification and review of relevant information and actively involve customers and other interested parties. Examples of relevant process information include but are not limited to:

Requirements of the customer or other interested parties, market research, including sector and end-user data, contract requirements,

Customer complaints are logged as non-conformances and treated in the same manner as AL BASRA AL RAEDA COMPANY own non- conformances, Key performance indicator KPIs are information used by AL BASRA AL RAEDA COMPANY , Investigation will be carried out to find the root causes and necessary corrective and preventive actions are taken to avoid recurrence and thus enhance customer satisfaction.

5.3 REVIEW OF CUSTOMER / CONTRACT REQUIREMENTS & SUPPLY

5.3.1. GENERAL

AL BASRA AL RAEDA COMPANY has established and implemented a documented procedure for the review of the requirements related to the provision of products, the execution of services or provision of service-related products.

5.3.2. CUSTOMER COMMUNICATION

AL BASRA AL RAEDA COMPANY has implemented effective communication with customers in relation to: Providing information relating to Products and /or Services and service related products;

- A) Handling enquiries, contracts or orders, including changes;
- B) Obtaining customer feedback relating to products and services, including customer complaints;
- C) Handling or controlling customer property;
- D) Establishing specific requirements for contingency actions, when relevant.

5.3.3. DETERMINATION OF REQUIREMENTS

The following Customer requirements shall be determined (where applicable) prior to providing the products and the execution of services or provision of service-related products to customers.

The company annually identify the following:

- The necessary requirements to execute the provided logistic services.
 - Determine the necessary requirements for the company's department's activities.
 - Determine the programs and necessary procedures to execute the required quality services.
 - Determine human and financial resources to execute the required quality services.
 - Determine the material and equipment requirement to execute the required quality services.
- A) Explicit customer requirements including delivery and post-delivery activities.
 - B) Implied customer requirements necessary for specified or intended use.
 - C) Statutory and regulatory requirements related to the product.
 - D) Additional requirements determined by the ORGANIZAION
 - E) This review shall be undertaken by the BD Manager, and where necessary, other management positions on accepting the Contract on behalf of the ORGANIZAION and conforming to the Customer Satisfaction.

5.3.4. REVIEW OF REQUIREMENTS

- Determine service requirements accurately.
- Ensure that the company is capable to meet the specified requirements.
- Maintain records of the administrative review results.

- 5.3.4.1. The Tendering /BD Manager shall ensure that appropriate contents of each contract are reviewed prior to AL BASRA AL RAEDA COMPANY Organizational commitment, relating to supply of service to customers, to ascertain that the requirements are satisfactorily defined and documented.
- 5.3.4.2. The Tendering Manager shall ensure that all requirements differing from those previously identified are resolved prior to committing to the contract.
- 5.3.4.3. The final review of tenders shall involve the following categories of personnel where appropriate – the MS General Manager, Operation Manager Financial Controller, other Department Heads and the Legal department or delegates. The final review will include aspects of the contract, which relate to commercial and legal requirements.
- 5.3.4.4. The Tendering Manager and the Operation Manager has the responsibility of evaluating technical aspects of contracts that require their input as well as ensuring that the ORGANIZAION has the capability to satisfy contractual requirements by assessing current capability and equipment availability together with available suitable, experienced and qualified manpower.
- 5.3.4.5. The particulars of a confirmed Contract will be recorded, referring to the Customer details, Job or Contract Number, Type of Order, Date required, and Location, where appropriate.
- 5.3.4.6. Amendments to contracts are approved and distributed by the Contract Holder, normally after consulting Department Heads.
- 5.3.4.7. All orders / contracts and amendments reviewed and confirmed will be communicated to the personnel concerned.
- 5.3.4.8. MR shall ensure that all records of review, actions shall be maintained as per BLC-IMS-P002 Control of Records

Client Contact

The company shall determine highly efficient communication methods with the clients to facilitate the requests following-up process through developed means such as email or the internet and so forth of communication means.

The provision of these means shall ensure the following:

- The provision of the requested information to the customer related to the service provided by the company to them.
- Work orders amendments or changes information provision.
- Handling any clients' complaints immediately and take the necessary action.

Page 63 of 109

5.3.5. AL BASRA AL RAEDA COMPANY DOCUMENTS

- A. How it receives and documents the requirements of potential clients,
- B. How it prepares submissions based on the client's requirements,
- C. How it reviews the submission for adequacy prior to sending it,
- D. How it compares contract details against the submission and, if there are any differences, how it resolves them,
- E. How it confirms the contract,
- F. How records from submission and contract review activities are maintained,
- G. How it receives and documents amendment to contract.

AL BASRA AL RAEDA COMPANY, ensures that the established procedures, which require enquires, quotations, contracts and orders are reviewed and studied, to ascertain that Client's requirements are adequately defined and are well understood.

Before submission of a tender or the acceptance of a contract or order, AL BASRA AL RAEDA COMPANY, verify that the company has the capability to meet the offer and contract requirements.

The procedure requires that any ambiguities or requirements be clarified with the Client prior to submission of the offer.

The contract or order awarded is further reviewed to ascertain that any difference between the contract or order and the Company's offer are resolved prior to acceptance of such contract or order.

In cases where the need has arisen to make an amendment to a contract the Manager concerned is responsible for ensuring that the amendment is documented and passed to all concerned in the Company. Any amendments to accepted contracts are processed as per original order. It may be necessary to hold the processing of any contracts if the amendments are going to affect the process of the contract.

Records of the contract review are maintained.

5.3.5.1 OPERATION CONTROL FOR SERVICES

5.3.5.1.1 CIVIL WORKS (BLC-IMS-WI-07)

The checklist are developed to effectively control the civil works activities as mentioned in BLC-IMS-WI07

5.3.5.1.1 GENERATOR INSPECTION & MAINTENANCE, ME & I WORK INSTRUCTIONS

The checklist are developed to effectively control the generator inspection and maintenance activities as mentioned in BLC-IMS-WI08, ME&I BLC-IMS-WI09.

5.3.6 OPERATION CONTROL / EFFECTIVENESS PROCEDURE (BLC-HSE-P004)

This procedure covers all functions, activities, processes resulted from occupational health and safety and Environmental impacts risks.

SAFETY OPERATIONAL CONTROL

All activities that affect the Integrated Management System must be planned and controlled via written management system documents, which must contain enough information so that staff can perform a task correctly and know that they have done it correctly under normal or abnormal operating conditions including emergency situations.

Special processes are carried out under pre-qualified conditions or procedures using qualified personnel, if required.

Equipment having a direct effect on the Health, Safety, and Environment & Quality Management System are properly maintained in order to ensure integrity of its process capability.

5.3.6.1 PERSONAL PROTECTIVE EQUIPMENT (BLC-HSE-P008)

AL BASRA AL RAEDA COMPANY recognizes that it is the responsibility of the employee to obtain and wear or use any protective clothing or equipment provided for his safety and health at work. Safety helmets and footwear are mandatory on all worksites. Dependent on the type of work and the environment of the worksite, other protective closing or equipment may be required and must be used as necessary. It is the responsibility of all supervisors to ensure that all personnel for whom they are responsible use protective clothing and equipment as necessary. The company shall provide suitable protective clothing and equipment whenever necessary.

5.3.6.2 PERMIT TO WORK SYSTEM (BLC-HSE-P009)

The main purpose of the Permit to Work (PTW) Procedure is to guarantee a Safe working procedure and to assign certain People to carry out specific work at certain time and place after taking the necessary precautions needed to complete the Job Safely this is to ensure that all personnel who will carry out the work are clearly understand the nature of the work & the Hazards associated with that work.

5.3.6.3 CUTTING AND WELDING (BLC-HSE-WI04)

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 65 of 109

This section addresses the hazards associated with the cutting and welding of metals. Work instructions mentioned in BLC-HSE-WI04).

5.3.6.4 RADIATION PROTECTION WORK INSTRUCTIONS (BLC-HSE-WI05)

This procedure specifies the personnel safety procedure, restricted area and storage of industrial radiography. Work instructions mentioned in BLC-HSE-WI05).

5.3.6.5 ELECTRICAL SAFETY WORK INSTRUCTIONS (BLC-HSE-WI06)

To provide information and guidance on electrical safety, arc flash protection, and personal protective equipment required when working on energized electrical equipment cannot be avoided. In the interest of providing a safe working environment and adhering to compliance with the Occupational Safety and Health Administration (OSHA) and the National Fire Protection Agency (NFPA), specifically the NFPA 70E, the Company prohibits its workforce from working on energized electrical equipment with exposed live parts unless circumstances make it absolutely necessary, in accordance with OSHA guidelines. Work instructions mentioned in BLC-HSE-WI06).

5.3.6.6 LOCK OUT & TAG OUT (BLC-HSE-P010)

This Procedure describes how energy services used to provide power to equipment are locked and tagged in the “off” or “de-energized” position to ensure that personnel working on that equipment are not at risk from its inadvertent or unauthorized re-energisation. An energy source is any electrical, mechanical, hydraulic, pneumatic, chemical, nuclear, thermal or other energy source that could cause injury to people.

The Objectives of this procedure are :

- A) to provide general information and procedures regarding the safe means to lockout and tag equipment
- B) to define responsibilities for ensuring effective lockout / tag out before work commences
- C) to set out how equipment is prepared prior to lockout
- D) to set out how lockout is achieved for individual work groups or where several separate groups are involved
- E) to describe how energy isolation is assured through inspection and testing prior to work commencing, and at intervals thereafter
- F) to define the process and responsibility for returning equipment to safe operation.

Procedure and work instruction mentioned in LOCK OUT & TAG OUT (BLC-HSE-P010).

5.3.6.7 CONFINED SPACES (Entry Procedure) SAFETY (BLC-HSE-P011)

Page 66 of 109

The purpose of this procedure is to establish a procedure which provides safeguards from dangerous air contamination and/or oxygen deficiency when entering and working in any confined space including tanks, vessels, cellars, pits, trenches, and other partially enclosed spaces which are subject to dangerous air contamination/ oxygen deficiency and lack of ready access/egress.

5.3.6.8 TRANSPORTATION & ROAD SAFETY PROCEDURE (BLC-HSE-P012)

AL BASRA AL RAEDA COMPANY Considers transportation and journey management as essential element of its daily business as almost all activities are related to driving. In the majority of traffic accidents, human behavior is shown to be the prime or sole cause. Traffic accidents will significantly decrease when all persons driving a vehicle improve their safety awareness, behavior and skills and when the journeys are managed to be safe journeys.

AL BASRA AL RAEDA COMPANY has a procedure dealing with the aspects of transportation and journey management.

5.3.6.9 SCAFFOLD SAFETY AND WORK AT HEIGHT PROCEDURE (BLC-HSE-P013)

To provide for maximum protection for all personnel while using scaffolding on Company projects. To comply with Subpart L of the OSHA Construction Standards during erection and use of scaffolds.

5.3.6.10. STAIRWAYS AND LADDERS USAGE WORK INSTRUCTIONS (BLC-HSE-W107)

Safety precautions while using stairways and ladders, mentioned in BLC-HSE-W107.

5.3.6.11. FALL PREVENTION AND PROTECTION WORK INSTRUCTIONS (BLC-HSE-W108)

To provide for maximum protection for all personnel against falls, and to use engineering and administrative controls to eliminate fall hazards through pre-task planning, Personnel on Company projects will be expected to provide for personnel fall protection in accordance with this procedure as a minimum.

5.3.6.12. HEALTH ASSESSMENT PROCEDURE (BLC-HSE-P014)

This procedure is to identify the controls on Operational processes that may lead to any Occupational Health issues to individuals working for the Organization as mentioned in BLC-HSE-P014.

5.3.6.13. LIFTING OPERATIONS SAFETY WORK INSTRUCTIONS (BLC-HSE-WI09)

To provide for maximum protection for all personnel, equipment, against lifting hazards, and to use engineering and administrative controls to eliminate fall hazards through pre-task planning. This procedure propose minimum mandatory requirements for conducting lifting operations safely in workplaces. It covers all lifting and hoisting operations using cranes, hoists and winches.

5.3.6.14. FIRE PREVENTION AND PROTECTION SAFETY WORK INSTRUCTIONS (BLC-HSE-WI10)

This procedure is to establish a fire permit control system for potentially hazardous areas with operations involving ignition sources.

5.4. WASTE MANAGEMENT WORK INSTRUCTIONS (BLC-HSE-WI11)

AL BASRA AL RAEDA COMPANY recognizes that waste is any substance which constitutes a scrap material or an effluent or other unwanted surplus substance arising from the application of any process; any substance or article which requires to be disposed of as being broken, worn out, contaminated or otherwise spoiled. This includes those wastes which are:

- A) Dangerous to life and property
- B) Having a flash point less than or equal to 21C
- C) Medicinal products available only on prescription
- D) Radioactive wastes
- E) Office and Operational wastes

5.5. EXCAVATION SAFETY WORK INSTRUCTION (BLC-HSE-WI12)

The purpose of this instruction is to ensure the safety of personnel, equipment and environment during excavation activities as checklists mentioned in BLC-HSE-WI12.

5.6 EMERGENCY PREPAREDNESS AND RESPONSE PROCEDURE (BLC-HSE-P005)

General

The Project Manager, HSE Supervisor, QHSE Manager in charge of each project is responsible for ensuring that the elements of the plan are prepared for and communicated to all employees on site.

Elements of all Emergency Action Plans

Each plan must include at least the following considerations:

Alerting employees to the emergency. The supervisor in charge of the project must make sure that all Employees may be contacted in the event of an emergency. This may be through telephones, two-way radios, air horns, or verbally.

Emergency escape procedures, routes and muster points. Make sure building exits are clearly marked and unobstructed. Establish a point, such as the job trailer, where all employees are to muster in the event of an emergency requiring evacuation. Be sure the muster point is not in a location that may obstruct emergency vehicles or place workers in further danger.

Accounting for all employees after an evacuation. Each supervisor is responsible for accounting for all employees after an evacuation has been ordered. Any employees unaccounted for must be reported to emergency services personnel.

Alerting Emergency Services. In most emergency situations Emergency agency should be called.

A) For remote or large job sites consider having someone meet emergency services personnel and direct them if necessary.

B) Consider accessibility of the job site. Will police, ambulance or fire trucks be able to access the site.

Emergency Response Supplies. Consider what type of emergencies may occur on the job and what type of supplies will be needed. Every job should have PPE and first aid supplies for administering first aid and CPR. Jobs with large amounts of hazardous materials should have spill cleanup supplies.

Responding to Emergencies.

Medical Emergency Response plan, Emergency Drills,

These steps should be followed in almost all emergencies in addition to the specific procedures listed below.

Immediately assess the scene to determine if you or others may still be in danger. Do not respond to any emergency if your own safety is threatened.

Stop work if necessary, evacuate employees and account for employees and subcontractors.

Contact the Safety Department (IF found)

Page 69 of 109

Provide First Aid to any injured employees.

Restrict access to the site to any unauthorized personnel including media. Any unauthorized personnel may place themselves in danger and/or obstruct emergency services personnel. Media can contact the main office for statements.

Take photographs of the incident scene. Include any property or equipment damage and any conditions that may have contributed to the incident.

After the emergency is under control, a thorough investigation is to be completed, including written statements from witnesses, and a report is to be turned in to the Safety Department.

SPECIFIC PROCEDURES TO FOLLOW IN EMERGENCIES

FIRE.

- A) Small fires may be put out with fire extinguishers by trained personnel. a) Always position yourself between the fire and an exit.
- B) After the fire is extinguished, report the incident to your supervisor and have the extinguisher replaced.

LARGE FIRES.

Sound any fire alarms and notify all workers to evacuate.

- A) Account for all employees and subs.
- B) Call Emergency agency to have someone direct fire trucks if necessary.
- C) Contact the Safety Department.
- D) Make sure traffic lanes, hydrants and standpipe connections are unobstructed.
- E) Assist firefighters as needed (ex. building layout, flammable/combustible storage areas, etc.)

MEDICAL EMERGENCIES.

- A) Call Emergency Agency.
- B) Provide First Aid. Use proper PPE to prevent contact with potentially infected blood or bodily fluids.
- C) Do not move any victim unnecessarily to avoid aggravating any injuries.
- D) Contact the Safety Department.

UTILITY DAMAGE.

- A) Ensure the safety of all workers.
- B) Contact the BLC one Call Service or Miss Utility and notify of the damage.
- C) Contact the Safety Department.

Page 70 of 109

- D) Check the utility location ticket to see if the utility was properly marked. Turn in a copy of the ticket with the incident report.
- E) Photograph the excavation, the damaged line and any meetings.

VEHICLE INCIDENT REPORT

A) Actions to Take Following a Vehicle Incident:

- a) Check for any injuries of all persons involved in the incident and call for medical assistance as necessary.
- b) Do not attempt to move injured persons except in emergency situations.
- c) Move any damaged vehicles out of roadways if possible and shut down the engine.
- d) Report the incident to the Safety Department and the police as soon as possible.
- e) Protect the scene by activating flashers and setting up reflective triangles if available.
- f) Exchange information with other parties.
- g) Fill out the incident report form completely including a sketch of the scene and names and numbers of witnesses.
- h) Take photos of the scene. Take photos from different angles starting away from the scene and working in closer if this can be done safely.

Photograph damage to any vehicles, license plates and/or truck numbers, any property damage, and any potential contributing factors (obstructed road signs, malfunctioning lights, etc.)

B) What not to do Following a Vehicle Incident.

- a) Never admit fault or apologize. Apologizing may be construed as an admission of guilt.
- b) Never argue with other drivers or witnesses.
- c) Never argue with police.
- d) Never make any statements to the media. Refer them to the company.
- e) Never discuss details of the incident with anybody other than the police or company representatives.
- f) Never agree with other drivers to not report an incident. They may be uninsured or uninspected, the car may be stolen, they may be intoxicated, etc.
- g) Never speak to anybody stopping at your home or calling at home about the incident. Refer them to the company.

Weather-Related Event.

- A) Immediately suspend any work from roofs, scaffolds, ladders or other work at elevations.
- B) Make sure all loose materials are secured to prevent flying in the wind.
- C) Seek shelter indoors.
- D) Listen to a radio weather station for further details and instructions.

E) Contact the Safety Department if there are any damages.

5.7 DESIGN AND DEVELOPMENT

5.7.1 GENERAL

AL BASRA AL RAEDA COMPANY is outsourcing the Design and its development and maintains all the associated controls to ensure that all the applicable elements of the supplier quality management system are satisfied and maintains responsibility for products and service conformance to specified requirements, including applicable specifications associated with products and service Realizations.

For all non API Products and as per Client Specifications, AL BASRA AL RAEDA COMPANY may outsource the design process and its development and may fulfill the design and its development by the Design Engineer.

For all the services, AL BASRA AL RAEDA COMPANY fulfills the design package and its development and are done by the Dep. SV, reviewed by the QA/QC Manager and finally approved by the Managing Director.

5.7.2 DESIGN AND DEVELOPMENT FOR PRODUCTS PROVISION

5.7.2.1 GENERAL

As per ISO 9001:2015

AL BASRA AL RAEDA COMPANY establishes, implements and maintains a design and development process that is appropriate to ensure the subsequent and realization provision of products.

5.7.2.2 DESIGN AND DEVELOPMENT PLANNING

As per ISO 9001:2015

AL BASRA AL RAEDA COMPANY maintains Drawing, Design and calculations Specification procedure to plan and control the design and development of the product. The procedure shall identify:

- A) The nature, duration and complexity of the design and development activities;
- B) The internal and external resource needs for the design and development of products and services;
- C) The need to control interfaces between persons involved in the design and development process;
- D) The need for involvement of customers and users in the design and development process;
- E) The requirements for subsequent provision of products and services;
- F) The level of control expected for the design and development process by customers and other relevant interested parties;
- G) The documented information needed to demonstrate that design and development requirements have been met

Integrated Management System Manual (IMS)

Code

- H) The plan(s), including plan updates, used for design development;
- I) The design and development process stages including applicable design development review;
- J) The resources, responsibilities, authorities, involved in the design and the need to control their interfaces to ensure effective communication;
- K) The required review, verification, and validation activities necessary to complete each design and
- L) Development stage; and
- M) The requirements for a final review of the design.

When design and development activities are performed at different locations within AL BASRA AL RAEDA COMPANY, the procedure shall identify the controls required to ensure that the designs meet the requirements of above.

NOTE Design and development review, verification, and validation each have distinct purposes but can be conducted and recorded separately or in any combination, as suitable for the product and AL BASRA AL RAEDA COMPANY

5.7.2.3 DESIGN AND DEVELOPMENT INPUTS

As per ISO 9001:2015

Inputs shall be identified and reviewed for adequacy, completeness, and lack of conflict. Inputs shall include functional and technical requirements, and the following, as applicable:

- A) Customer-specified requirements;
- B) Any functional or performance requirements;
- C) Requirements provided from external sources, including API product specifications;
- D) Environmental and operational conditions;
- E) Methodology, assumptions, and formulae documentation;
- F) Historical performance and other information derived from previous similar designs;
- G) Standards or codes of practice that AL BASRA AL RAEDA COMPANY is committed to implement such as and not limited to ISO 9001:2015.
- H) Potential consequences of failure due to the nature of the products and /or services related products;
- I) Legal, Statutory and regulatory requirements; and
- J) Results from risk assessments.
- K) Records of design inputs shall be maintained.
- L) Inputs shall be adequate for design and development purposes, complete and unambiguous.
- M) Conflicting design and development inputs shall be resolved.

5.7.2.4 DESIGN AND DEVELOPMENT CONTROLS

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 73 of 109

As per ISO 9001:2015

AL BASRA AL RAEDA COMPANY applies controls to the design and development process to ensure that:

- A) The results to be achieved are defined;
- B) Reviews are conducted to evaluate the ability of the results of design and development to meet
- C) Verification activities are conducted to ensure that the design and development outputs meet the input requirements;
- D) Validation activities are conducted to ensure that the resulting products and services meet the requirements for the specified application or intended use;
- E) Any necessary actions are taken on problems determined during the reviews, or verification and validation activities;
- F) AL BASRA AL RAEDA COMPANY retains a documented information of these activities,

5.7.2.5 DESIGN AND DEVELOPMENT OUTPUTS

As per ISO 9001:2015

Outputs shall be documented to allow verification against the design and development input requirements.

Outputs shall:

- A) Meet the input requirements for design and development;
- B) Provide appropriate information for purchasing of any required service-related product
- C) Identify or reference design acceptance criteria (DAC);
- D) Include identification of, or reference to, products and/or components deemed critical to the design;
- E) Include or reference monitoring and measuring requirements, as appropriate, and acceptance criteria;
- F) Be adequate for the subsequent processes for the provision of products and services;
- G) Include results of applicable calculations; and
- H) Specify the characteristics of the product that are essential for its safe and proper use.
- I) Records of design outputs shall be maintained.

5.7.2.6 DESIGN AND DEVELOPMENT REVIEW

At suitable stages, review(s) shall be performed:

- A) To evaluate the suitability, adequacy, and effectiveness of the results of design and development stages to meet specified requirements; and
- B) To identify any problems and propose necessary actions.

Integrated Management System Manual (IMS)

Code

Revision

00

Date

17/01/2026

Page 74 of 109

Participants in such review(s) shall include representatives of functions concerned with the design and development stage(s) being reviewed. Records of the results of the review(s) and any necessary actions shall be maintained.

5.7.2.7 DESIGN AND DEVELOPMENT VERIFICATION AND FINAL REVIEW

To ensure that the design and development outputs have met the design and development input requirements, design and development verification and a final review shall be conducted and documented in accordance with planned arrangements.

Records of design and development verification and the final review shall be maintained

5.7.2.8 DESIGN AND DEVELOPMENT VALIDATION AND APPROVAL

Design and development validation shall be performed in accordance with planned arrangements to ensure that the resulting product is capable of meeting the specified requirements.

Validation shall be completed prior to the delivery of the product, when possible.

The completed design shall be approved after validation. Competent individual(s) other than the person or persons who developed the design shall approve the final design.

Records of the design and development validation, approval, and any necessary actions shall be maintained

5.7.2.9 DESIGN AND DEVELOPMENT CHANGES

As per ISO 9001:2015

Design and development changes shall be identified. The changes shall be reviewed, verified, and validated, as appropriate, the actions taken and approved before implementation to ensure that there is no adverse impact on conformity to requirements.

The review of design and development changes shall include the results of reviews; and include evaluation of the effect of the changes on product and/or their constituent parts already delivered.

Design and development changes, including changes to design documents, shall require the same controls as the original design and development.

Records of design and development changes, the authorization of the changes, reviews of those changes, and any necessary actions to prevent adverse impact shall be maintained.

5.7.3 DESIGN AND DEVELOPMENT FOR SERVICE EXECUTION

5.7.3.1 GENERAL

17/01/2026

Page 75 of 109

AL BASRA AL RAEDA COMPANY establishes, implements and maintains a design and development process that is appropriate to ensure the subsequent and realization provision of products.

5.7.3.2 DESIGN AND DEVELOPMENT PLANNING

As per ISO 9001:2015,
AL BASRA AL RAEDA COMPANY maintains a documented procedure, Drawings Design Calculations and Specifications to plan and control the design and development of the service, including the use of service-related products.

The procedure identifies:

- A) The design and development stages;
- B) The activities required for completion, review, and verification of each stage;
- C) The interfaces between different groups involved in design and development; and
- D) The responsibilities and authorities for the design and development activities.
- E) The nature, duration and complexity of the design and development activities;
- F) The need for involvement of customers and users in the design and development process;
- G) The requirements for subsequent provision of products and services;
- H) The level of control expected for the design and development process by customers and other relevant interested parties;

When design and development are outsourced, AL BASRA AL RAEDA COMPANY ensures that the supplier meets the requirements and provide objective evidence that the supplier has met these requirements as per purchasing procedure.

5.7.3.3 DESIGN AND DEVELOPMENT INPUTS

As per ISO 9001:2015, Inputs relating to design of the service are determined and records are maintained as per BLC-IMS-P002

Control of Record. These inputs shall include:

- A) customer-specified requirements;
- B) Standards or codes of practice that AL BASRA AL RAEDA COMPANY is committed to implement such as and not limited to ISO 9001:2015
- C) Potential consequences of failure due to the nature of the products and /or services related products;
- D) Legal requirements; and
- E) Other applicable requirements including:
- F) Requirements provided from an external source,

Integrated Management System Manual (IMS)

Code

Page 76 of 109

- G) Requirements for service-related products, including its functional and technical requirements,
- H) Environmental and operational conditions,
- I) Results from risk assessments, and
- J) Historical performance and other information derived from previous similar service designs.
- K) Inputs shall be adequate for design and development purposes, complete and unambiguous.
- L) Conflicting design and development inputs shall be resolved

5.7.3.4 DESIGN AND DEVELOPMENT OUTPUTS

As per ISO 9001:2015

The outputs of design and development are documented to allow verification against the design and Development input requirements. Design and development outputs shall:

- A) Meet the input requirements for design and development;
- B) Provide information for purchasing of any required service-related product;
- C) Provide controls for the execution of the service, including allowable variations in the service execution parameters;
- D) Include or reference acceptance criteria for the completion of the service; and
- E) Identify critical service-related product.

5.7.3.5 DESIGN AND DEVELOPMENT VERIFICATION

As per ISO 9001:2015

Verification of the design of the service is performed in accordance with planned arrangements to ensure that the design and development outputs have met the design and development input requirements.

Records of the results of the verification are maintained.

5.7.3.6 DESIGN AND DEVELOPMENT FINAL REVIEW AND APPROVAL

As per ISO 9001:2015

A final design and development review and approval are conducted and documented. Individual(s) other than the Person or persons who developed the design shall review and approve the final design and development outputs.

Records of the results of the final review and approval are maintained.

5.7.3.7 CONTROL OF DESIGN AND DEVELOPMENT CHANGES

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 77 of 109

As per ISO 9001:2015

Changes in the approved design are reviewed and verified by the management of change process as per Management of Change Procedure.

Records of design and development changes, the authorization of the changes, reviews of those changes, and any necessary actions to prevent adverse impact shall be maintained.

5.8 PROCUREMENT, PURCHASING, APPROVAL OF VENDORS, SUPPLIERS & SUB-CONTRACTORS & SERVICING

PROCUREMENT PROCEDURE (BLC-IMS-P007), SUBCONTRACTOR AND SUPPLIER MANAGEMENT PROCEDURE (BLC-IMS-P008)

As per BLC-IMS-P007 Procurement Procedure, AL BASRA AL RAEDA COMPANY ensures that externally provided processes, products and services conform to requirements.

AL BASRA AL RAEDA COMPANY is determining the controls to be applied to externally provided processes, products and services when:

- A) Products, services and /or service related products from external providers are intended for incorporation into AL BASRA AL RAEDA COMPANY 's own products and services;
- B) Products and services are provided directly to the customer(s) by external providers on behalf of AL BASRA AL RAEDA COMPANY , in this case there will be a technical representative from AL BASRA AL RAEDA COMPANY while delivering the mentioned
- C) A process, or part of a process, is provided by an external provider as a result of a decision by AL BASRA AL RAEDA COMPANY

AL BASRA AL RAEDA COMPANY determines, applies criteria and maintains records for the evaluation, selection, monitoring of performance, and re-evaluation of external providers, externally provided processes, based on their ability to provide processes or products, services and/or service related products in accordance with requirements.

5.8.1 PURCHASING CONTROL

As per purchasing procedure and Approval of suppliers. Through these mentioned procedures:

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 78 of 109

- A) It is the responsibility of the Procurement Manager, Operation Manager and/or Quality Assurance Manager or delegate, to ensure that the correct specification(s) are provided for all purchased items and these items are accepted after necessary tests/ inspection.
- B) Only sources satisfying AL BASRA AL RAEDA COMPANY requirements as defined in purchasing procedure and included in the list of Approved Suppliers are selected for the supply of products or services or service- related products that are critical to the quality of AL BASRA AL RAEDA COMPANY activities.
- C) Criteria for initial selection, evaluation and re-evaluation will be established based on their ability to supply products and/or services or service-related products in accordance with the AL BASRA AL RAEDA COMPANY 's requirements and results are recorded.
- D) The MS General Manager or The Management Representative or his appointed delegate shall identify the criteria and controls applied on suppliers based on the criticality of the product or service supplied
- E) The MS General Manager or The Management Representative or his appointed delegate is responsible about identifying the scope, frequency and methods used for the reassessment of the suppliers
- F) The Purchasing Manager shall keep an updated and approved list of approved suppliers.

5.8.1.1 INITIAL SUPPLIER EVALUATION – CRITICAL PURCHASES

For Approval of Suppliers:

- A) The Quality Assurance Manager shall verify that suppliers of critical purchases adopts a quality management system that conforms with AL BASRA AL RAEDA COMPANY 's stated requirements
- B) The MR shall assess al suppliers of critical purchases to ensure capabilities to meet AL BASRA AL RAEDA COMPANY 's purchased requirements by:
 - 1. Performing an on-site evaluation of relevant activities, or
 - 2. Performing first article inspection to ensure conformance to stated requirements, or
 - 3. Identify how the supplied product or service conforms to stated requirements when limited by proprietary, legal and/or contractual arrangements.

5.8.1.2 INITIAL SUPPLIER EVALUATION – NONCRITICAL PURCHASES

The Quality Assurance Manager and Procurement Manager shall verify that suppliers of non-critical purchases (Products, components or activities or services or service-related products) adopts a quality management system that conforms with AL BASRA AL RAEDA COMPANY 's stated requirements, or

The MR or his delegate shall assess all suppliers of non-critical purchases to ensure capabilities to meet AL BASRA AL RAEDA COMPANY 's purchased requirements, or

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 79 of 109

The Quality Assurance Manager or his delegate shall assess the product or services or service-related products upon delivery or activity upon completion.

5.8.1.3 SUPPLIER RE-EVALUATION

For re-evaluation of all suppliers, critical or noncritical, AL BASRA AL RAEDA COMPANY implements requirement specified in the item as above mentioned.

AL BASRA AL RAEDA COMPANY maintains Approved Foreign Supplier List and Approved LOCAL Supplier List, in which all suppliers are categorized and the frequency of evaluation is mentioned.

5.8.1.4 SUPPLIER EVALUATION – RECORDS

The MR shall ensure that all records resulted from supplier's evaluation and re-evaluation are maintained as per BLC-IMS-P002 Control of Records.

5.8.2 PURCHASING INFORMATION

AL BASRA AL RAEDA COMPANY establishes and communicates adequate purchasing requirements for:

- A) Its externally provided processes, products and services or service-related products;
- B) Requirements for approval of supplier's Products, services, procedures, processes, equipment, methods and the release of products and services;
- C) Applicable version of specifications, drawings, process requirements, inspection, instruction, traceability, and other relevant technical data;
- D) Requirements for competency and qualification of supplier's personnel; and
- E) The external providers' interactions with the AL BASRA AL RAEDA COMPANY ;
- F) Requirements for acceptance criteria of Product and service or service related product;
- G) Control and monitoring of the external providers' performance to be applied by AL BASRA AL RAEDA COMPANY ;
- H) Verification or validation activities that AL BASRA AL RAEDA COMPANY , or its customer, intends to perform at the external providers' premises.
- I) Quality management system requirements.

5.8.3 VERIFICATION AND CONTROL OF PURCHASED PRODUCTS, SERVICES, SERVICES RELATED PRODUCTS, EXTERNALLY PROVIDED PROCESSES AND ACTIVITIES.

- A) AL BASRA AL RAEDA COMPANY maintains a documented procedure for the verification or other activities necessary for ensuring that purchased products or services or service-related products activities meet specified purchase requirements.
- B) AL BASRA AL RAEDA COMPANY ensures and provides evidence that purchased products, services or service-related products and activities conform to specified requirements.
- C) AL BASRA AL RAEDA COMPANY takes into consideration:
 - a) The potential impact of the externally provided processes, products, services and services related products on AL BASRA AL RAEDA COMPANY ability to consistently meet customer and applicable statutory and regulatory requirements;
 - b) The effectiveness of the controls applied by the external provider.
- D) When any purchased material or equipment arrives at the AL BASRA AL RAEDA COMPANY premises, the concerned Supervisor or delegates, checks them for condition and conformance to the Purchase order. He shall ensure that appropriate certification has been received if mentioned on purchase order, complete with Goods Received Note and appropriate inspection work is carried out in accordance BLC-IMS-P007, Purchasing.
- E) When equipment returns from service location, it shall be tagged and subject to the necessary inspection and maintenance servicing as stated in documented procedures.
- F) If any items are non-conforming they will be subject to the procedures outlined in Control of Nonconforming Products, service and Service-related product Procedure and tagged, labeled or otherwise identified as having a non-conforming inspection status.
- G) All equipment is inspected before it is held as stock item or dispatched. The exception to this is where a customer has indicated that exceptional circumstances constitute an operational emergency, requiring the equipment to be dispatched immediately, even though inspection has not been performed due to time constraints. Under these circumstances, the Operation Manager, Supervisor or their delegates for positive recall will register the product.
- H) Where AL BASRA AL RAEDA COMPANY or its customer intends to perform verification at the supplier's premises, AL BASRA AL RAEDA COMPANY states the intended verification arrangements and method of product release in the purchasing information.

- I) The MR shall keep the records of the verification activities as per BLC-IMS-P002 Control of Records.

5.9 Control of Production, Servicing execution and Provision

5.9.1 Control of Production and Servicing

5.9.1.1 Control of Production

AL BASRA AL RAEDA COMPANY scope of work is providing inspection and repair services; AL BASRA AL RAEDA COMPANY maintains a documented procedure (As per Control of Production, Servicing execution and Provision procedure) that describes controls associated with the production of products and. The procedure shall address the following:

- A) The availability of information that describes the characteristics of the product;
- B) Implementation of the product quality plan, when applicable;
- C) Ensuring design requirements and related changes are satisfied, when applicable;
- D) The availability and use of suitable production, testing, monitoring, and measurement equipment;
- E) The availability of work instructions, when applicable;
- F) Process control documents;
- G) The use of suitable infrastructure and environment for the operation of processes;
- H) The validation, and periodic revalidation, of the ability to achieve planned results of the processes for production, where the resulting output cannot be verified by subsequent monitoring or measurement;
- I) The appointment of competent persons, including any required qualification;
- J) The implementation of actions to prevent human error;
- K) Implementation of monitoring and measurement activities at appropriate stages to verify that the criteria for control of processes or outputs, and acceptance criteria for products and services have been met; and
- L) Implementation of product release, including applicable delivery and post- delivery activities.

5.9.1.2 CONTROL OF SERVICING EXECUTION

AL BASRA AL RAEDA COMPANY, where appropriate will validate the production or services or service-related products processes to achieve the planned results by utilizing detailed route sheets and associated quality forms. Provision is made to ensure that the appropriate equipment is used, competent personnel are involved, specific methods and procedures are employed, records are maintained and the continuous assessment by re-validation of the process.

AL BASRA AL RAEDA COMPANY maintains a documented procedure (Control of Production, Servicing execution and Provision procedure) that describes controls associated with the execution of servicing of products or service related products. The procedure shall address the following:

- A) Review and implementation of AL BASRA AL RAEDA COMPANY 's, customer-specific, product servicing, and other servicing requirements;
- B) Personnel training and competency;
- C) Risk assessment and management;
- D) Contract requirements;
- E) Information that describes the characteristics of the service and service related products and ensuring that design requirements are satisfied
- F) The availability and use of suitable servicing, testing, monitoring, and measurement equipment;
- G) The availability of work instructions, when applicable;
- H) Ensuring identification and traceability requirements are maintained throughout the servicing process;
- I) Implementation of monitoring and measurement activities at appropriate stages to verify that the criteria for control of processes or outputs, and acceptance criteria for products and services have been met; and
- J) Process control documents; The use of suitable infrastructure and environment for the operation of processes;
- K) The validation, and periodic revalidation, of the ability to achieve planned results of the processes for service provision, where the resulting output cannot be verified by subsequent monitoring or measurement;
- L) The appointment of competent persons, including any required qualification;
- M) The implementation of actions to prevent human error such as and not limited to provision of training, training evaluation fulfilment of site visits, supervision on the process control document ,review reports, etc...

5.9.1.3 PROCESS CONTROL DOCUMENTS

- A) The Operation Manager or delegate / department Supervisor shall document the process controls in the shape of route sheet, traveler, and appropriate checklist
- B) The process control documents shall include requirement for verification of conformance with applicable quality plans, API specification, customer requirements and/or other applicable standards and codes, as well as acceptance criteria and required customer's inspection or witness points.

5.9.1.4 PRODUCT REALIZATION CAPABILITY DOCUMENTATION

- A) AL BASRA AL RAEDA COMPANY scope of work is providing inspection, testing and repair services

Integrated Management System Manual (IMS)

Code

Page 83 of 109

Inspection and Testing procedure

- B) AL BASRA AL RAEDA COMPANY maintains documentation such as product realization plans and records of review/verification, validation, monitoring, measurement, inspection, and test activities, including criteria for product acceptance that demonstrates the capability of the organization to satisfy specified product and/or servicing requirements.

5.9.1.5 VALIDATION OF PROCESSES FOR PRODUCTION AND SERVICING

- A) The QA Manager and the Operation Manager or delegates shall identify processes of servicing where results cannot be verified by subsequent monitoring and measurement and as a consequence, deficiencies may become apparent only after the servicing has been delivered.
- B) The QA Manager and the Operation Manager or delegates shall ensure that validation of these processes shall demonstrate the ability of these processes to achieve the planned results.
- C) Where AL BASRA AL RAEDA COMPANY chooses to outsource a process that requires validation, the AL BASRA AL RAEDA COMPANY requires that the supplier conform to these requirements.
- D) AL BASRA AL RAEDA COMPANY maintains a documented procedure to address methods for review and approval of the processes as per Calibration and Maintenance of Equipment Procedure:
- Required equipment
 - Qualification of personnel
 - Use of specific methods
 - Identification of acceptance criteria
 - Requirements for records
 - Revalidation
- E) AL BASRA AL RAEDA COMPANY validates those processes identified by the applicable product specification as requiring validation as nondestructive examination and welding, PWHT and Phosphate if applicable to the product and/or the Service.

5.9.2 PRODUCT / SERVICE QUALITY PLANS

When required by contract, AL BASRA AL RAEDA COMPANY develops a product / Service quality plan that specifies the processes of the quality management system (Including the product realization processes and / or the execution of services,) and the resources to be applied to a product.

The product quality plan required by contract shall address each of the following as a minimum:

Description of the product to be manufactured;

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 84 of 109

- A) Required processes, activities and documentation, including required inspections, tests, and records, for conformance with customer and legal requirements;
- B) Identification of responsible functions for each activity, including external parties;
- C) Identification and reference to control of outsourced activities and subcontractors;
- D) Identification of each revision procedure, specification, or other document referenced or used in each activity;
- E) Identification of the required hold, witness, monitor, and document review points to perform acceptance for the representative of the organization and the customer;
- F) Identification of critical services and service-related product
- G) Identification of the required deliverables; and identification of the required records.
- H) Identification and controls of risk;
- I) Service equipment and monitoring devices
- J) Identification of responsible functions for each activity, including external parties;

These product quality plans and any revisions to them shall be documented and approved The QA Manage to ensure customer requirements are met.

These product quality plans and any revisions shall updated and communicated to the customer.

5.9.3 IDENTIFICATION AND TRACEABILITY (BLC-IMS-WI-05)

- 5.9.3.1. AL BASRA AL RAEDA COMPANY maintains a documented procedure for identification and traceability of service-related product and the product while is under control of AL BASRA AL RAEDA COMPANY .
- 5.9.3.2. The procedure includes identification controls at all stages of delivery, post-delivery activities, installation, repair, and redress as required by AL BASRA AL RAEDA COMPANY and the customer.
- 5.9.3.3. The procedure includes requirements for maintenance or replacement of identification and traceability markets, verify, protect and safeguard customers' or external providers' property provided for use or incorporation into the products and services.
- 5.9.3.4. Service-related product and critical service-related product are identified, traceable to preventive maintenance, inspection, and test program (PMITP).
- 5.9.3.5. The service provided at the customer premises is identified by reference to Customer details operation work log sheet.
- 5.9.3.6. The Quality Assurance Manager establishes an identification system that uses colour codes to indicate the current status of a product, services or service-related products
- 5.9.3.7. The service provided at the customer premises is identified by reference to Customer details operation work log sheet.

Integrated Management System Manual (IMS)

Code

Page 85 of 109

- 5.9.3.8. The Quality Assurance Manager establishes an identification system that uses color codes to indicate the current status of a product, services or service-related products.
- 5.9.3.9. When it is not practical to operate a labelling Procedure, the inspection status shall be indicated by appropriate marketing on the product or the services or service-related products itself, which will be backed up by necessary records in agreement with the Quality Assurance Manager or delegate.
- 5.9.3.10. Control features are established to include requirements for the maintenance or replacement of the identification and traceability marketing, and records. The products arriving at the facility for repair will have appropriate color coded labels, which describes the work to be performed and these products, services or service-related products will also have the Goods Receiving Record written on them so that they can be traced easily to the supporting documentation.
- 5.9.3.11. Each item shall be identified and traceable through all stages, of repair and maintenance.
- 5.9.3.12. Electronic and Mechanical Measurement Equipment are affixed with a color coded label that shows when it was calibrated and when it is due for calibration.
- 5.9.3.13. The Quality Assurance, Head Department or delegate and the store keeper shall keep copies of all records related to identification and traceability as per BLC-IMS-P002 Control of Records.

5.9.4 SERVICE-RELATED PRODUCT STATUS AND /OR PRODUCT INSPECTION/TEST STATUS

- 5.9.4.1. The Quality Assurance Manager or delegate shall identify the process of product inspection and/or test status throughout the process.
- 5.9.4.2. The Quality Assurance Manager or delegate shall ensure the implementation of the inspection and/or test process throughout the process.
- 5.9.4.3. The Quality Assurance Manager or delegate shall ensure that only products and /or Service-related product status that meet the requirements shall be released. Non-conforming products, service and /or Service-related product shall be dealt with Control of Nonconforming Products, service and Service- related product Procedure.

5.9.5 CUSTOMER-SUPPLIED PROPERTY

- 5.9.5.1. All Customer supplied items for the use in the product, the service and / or with the service-related product, including intellectual property and data, received by AL BASRA AL RAEDA COMPANY , will be inspected upon receipt by the storekeeper and the relevant Supervisor or his delegate for the service
These items shall be stored, maintained and processed into the system after such inspection had been undertaken.
- 5.9.5.2. Customer's or external provider's property can include materials, components, tools and equipment, premises, intellectual property and personal data

Integrated Management System Manual (IMS)

Code

Revision

00

Date

17/01/2026

Page 86 of 109

5.9.5.3. For losses, damages and discrepancies with any customer supplied item, the customer shall be informed. The items concerned shall be placed in quarantine, and the customer will be asked to provide a written instruction on further action required. In the event of a non-conformance, an NCR (Non-Conformance Report) will be raised and processed.

5.9.5.4. The QA or The QC, respective Department heads and the Storekeeper Maintains records for the control and disposition of customer-supplied property.

5.9.6 PRESERVATION OF SERVICE RELATED PRODUCT AND / OR PRODUCT

5.9.6.1. As per Storing procedure and Material Control Procedure.

5.9.6.2. Preservation of service, service-related product and / or Product shall be limited to customer property supplied for repair, either at customer premises or at the AL BASRA AL RAEDA COMPANY yard and this preservation includes identification and traceability marketing, storage, handling and protection

5.9.6.3. Storage and assessment (as per Storing procedure and Material Control procedure) AL BASRA AL RAEDA COMPANY identifies the requirements for storage and assessment. AL BASRA AL RAEDA COMPANY uses designated storage areas to prevent damage or deterioration of service, service related product and / or product, pending use or delivery.

5.9.6.4. In order to prevent the deterioration, AL BASRA AL RAEDA COMPANY maintains records, procedure and interval which shall be appropriate to the service, service-related product and / or products or constituent parts being assessed. **AL BASRA AL RAEDA COMPANY has documented:**

- i. How items received from clients are recorded.
- ii. How items are handled and stored while under the control of AL BASRA AL RAEDA COMPANY
- iii. How non-conforming, lost or damaged items are reported back to the client.
- iv. How the item is returned to the client.

5.9.7 INSPECTION AND TESTING

5.9.7.1 GENERAL

AL BASRA AL RAEDA COMPANY maintains a documented procedure (Inspection and Testing Procedure) for inspecting and testing to verify that the product requirements have been met

The process shall include the in-process and final inspection and testing. Records shall be maintained as per BLC-IMS-P002 Control of records.

5.9.7.2 IN-PROCESS INSPECTION AND TESTING

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 87 of 109

The QA manager shall define inspection and test points during the process,

The Operation Manager shall ensure that the in-process inspection and testing are as per quality plan, process control document procedure,

The Operation Manager or delegate shall ensure that these inspections and testing are taking place as planned.

The QA Manager or the QC maintains Records as per BLC-IMS-P002 Control of Records.

5.9.7.3 FINAL INSPECTION AND TESTING

The QA Manager shall ensure that final inspection and testing shall take place as described in Quality plan.

The QA Manager shall ensure that personnel other than those who did the process are conducting the final inspection and testing.

5.9.8 VALIDATION OF THE SERVICE-RELATED PRODUCT

As per Validation of the service-related product and service performance procedure Validation of the service-related product are being completed prior to the execution of the service and records of the results of this process of validation, when performed are maintained.

5.9.9 PREVENTIVE MAINTENANCE, INSPECTION AND TEST PROGRAM (PMITP)

As per Calibration and Maintenance Equipment Procedure.

5.7.9.1. The QA Manager and the Maintenance Manager develop and maintain a documented procedure for the (PMITP) preventive maintenance, test and inspection program for all equipment used in AL BASRA AL RAEDA COMPANY 's activities.

5.7.9.2. The plan shall identify requirements for:

- A) Type of equipment
- B) Frequency of maintenance
- C) Responsibility

As a minimum, the PMITP shall include:

- a. Actions which address preventive maintenance;
- b. Reports that document usage history, repairs or redress, modifications, remanufacturing, inspection, and test activities that allow direct verification for reuse of product;
- c. List of critical spare parts requirements by the customer and/or technical requirements including those recommended by the original equipment manufacturer; and

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 88 of 109

- d. Controls that ensure equipment integrity to original performance requirements and design acceptance criteria are maintained.

5.7.9.3. The PMITP is also based on the risk, system reliability, usage history, experience, industry recommended practices, relevant codes and standards, original equipment manufacturing guidelines, or other applicable requirements.

5.7.9.4. Records of PMITP preventive maintenance shall be maintained, test and inspection program.

5.7.9.5. Original performance requirements that cannot be met shall undergo the MOC process for continued use.

5.10 CONTROL OF TESTING, MEASURING, MONITORING AND DETECTION EQUIPMENT PROCEDURE (BLC-IMS-P009)

As per Control of Testing, Measuring, Monitoring and detection Equipment and Calibration Instruction.

5.10.1 GENERAL

As per Control of Testing, Measuring, Monitoring and detection Equipment and Calibration

Instruction, AL BASRA AL RAEDA COMPANY determines and provides the resources needed to ensure valid and reliable results when monitoring or measuring is used to verify the conformity of products and services to requirements. AL BASRA AL RAEDA COMPANY ensures that the resources provided: -

1. Are suitable for the specific type of monitoring and measurement activities being undertaken;
2. Are maintained to ensure their continuing fitness for their purpose.

AL BASRA AL RAEDA COMPANY retains appropriate documented information as evidence of fitness for purpose of the monitoring and measurement resources

5.10.1.1. A calibration and maintenance system will be employed to ensure that the quality of the AL BASRA AL RAEDA COMPANY's equipment and service is consistently maintained and documented. The system shall encompass all inspection and measuring, Monitoring and detection equipment, used in the AL BASRA AL RAEDA COMPANY's activities, as explained in Control of Testing, Measuring, Monitoring and detection Equipment and Calibration Instruction.

5.10.1.2. The QA Manager or his delegate shall have final responsibility for the calibration system. The QA or his delegate is responsible for the maintenance of measuring and test equipment and the update of documentation

Integrated Management System Manual (IMS)

Code

BLC-IMS-MAN

Revision

00

Date

17/01/2026

Page 89 of 109

related to calibration, repair and certification, QA or his delegate is also responsible for the identification of calibration or inspection methods including adjustments or the re –adjustment.

5.10.1.3. The accuracy of all measuring equipment should be traceable to National and/ or International Standards.

5.10.1.4. Inspection, measuring, Test, monitoring and detection equipment shall be calibrated at quarterly intervals established by stability and usage. All equipment will have unique color coded labels affixed to it, which provides the serial number, date of last calibration and the due date for next calibration.

5.10.1.5. AL BASRA AL RAEDA COMPANY ensures that the environmental conditions are suitable for the calibrations, inspections, measurements and tests being carried out. A temperature range of 15 to 25 degrees Celsius has been adopted as the suitable temperature required for calibration. This is ensured with the aid of a thermometer placed in the room where the calibration process is carried out.

5.10.1.6. Each item of inspection, measuring and test equipment has been recorded in the Calibration Register and each instrument has its own Calibration Record and status that lists the previous calibration history of the instrument.

5.10.1.7. AL BASRA AL RAEDA COMPANY assesses and records the validity of the previous measuring results when the equipment is found not to conform to requirements. The equipment used by the QA/QC Inspectors is entered in the Inspection Report, so that the products inspected by any equipment can be traced.

5.10.1.8. Before being put into use, every instrument is checked against slip gauges or the standard setting rods to ensure that the measuring equipment is not out of calibration.

5.10.1.9. AL BASRA AL RAEDA COMPANY takes appropriate action on the measuring equipment and any product affected by the equipment.

The discrepant measuring equipment would be referred for re-calibration. However if the equipment cannot be re-calibrated, it shall be marked as “beyond repair” in the Calibration Register and shall be removed from service. Similar observation will be recorded in the Calibration Record of the discrepant measuring equipment.

5.10.1.10. The acceptance criteria for any measuring equipment have been detailed in Calibration Instruction.

5.10.1.11. The Quality Assurance Manager or delegate will ensure that where sub-contractors are utilized, they conform to all Company requirements with respect to inspection, measuring and test equipment.

5.10.1.12. When used in the testing, measurement, monitoring and detection of specified requirements, the ability of computer software to satisfy the intended application is confirmed. This is undertaken prior to initial use and reconfirmed as necessary.

5.10.1.13. When specified, technical data pertaining to measuring equipment will be made available to the customer or their representative for verification so that such equipment is functionally adequate.

5.10.1.14. The measuring equipment will be maintained well to safeguard its integrity and avoid misuse as well as protected during handling, maintenance and storage.

- 1) What needs to be monitored and measured?
- 2) How it monitors and measures the QHSE aspects and performance parameters and the methods for monitoring, measurement, analysis and evaluation needed to ensure valid results;
- 3) When the monitoring and measuring shall be performed and The frequency of monitoring
- 4) When the results from monitoring and measurement shall be analyzed and evaluated.
- 5) How the results of monitoring & measurement are recorded
- 6) How actions arise as a result of monitoring & measurement

6.1.3 MEASUREMENT AND MONITORING OF PRODUCTS & SERVICES (BLC-IMS-WI-03)

AL BASRA AL RAEDA COMPANY maintains a mechanism to ensure: Items, goods and services received are exactly as ordered and conform to all specifications. Appropriate inspection and / or verification takes place throughout the operation process.

Records are retained to prove that the above checking was carried out and those acceptable (“pass”) results were achieved. Additionally, verifiers must identify themselves on the records to provide accountability.

AL BASRA AL RAEDA COMPANY defines:

- A) How it inspects and verifies services and products provided by suppliers and subcontractors that affect its service to the client.
- B) How documents and specifications are checked as they are developed / received
- C) How it verifies and inspects all jointing activities.
- D) How it reports on all its activities.

The company seeks to monitor all the services operations to ensure that it meets the requirements through the following:

- a) Monitoring the clients satisfaction statistics form and feedbacks and adopt it as one of the quality management system performance evaluation standards (integrated management standard standards), Analyzing all the client feedback and wishes, data received through the constant communication.
- b) Establishing effective maintained system and ensuring that the quality management system which is part of the Integrated Management System matches with the ISO 9001: 2008 planned arrangements requirements, internal audits on a planned periods must be conducted.
- c) Establishing a documented procedures to identify responsibilities and requirements for the internal audits planning and execution, as well as preparing a summary reports on the non-conformity reasons and such reports must be saved in a designated records constantly.
- d) Take the necessary actions to remove the non-conformity cases and their causes with verification of the effectiveness of these actions.

Date

17/01/2026

Page 94 of 109

e) Applying a proper methods to monitor the Quality Management System through testing and determining the variation cases and compare them with requirements of the specification above and the corrective and preventive procedures shall be carried out in line with ensuring the conformity of the product to the requirements.

f) Develop a service control system throughout the progress stages.

6.1.4 MEASUREMENT AND MONITORING OF PROCESSES

AL BASRA AL RAEDA COMPANY has established suitable methods for measurement and monitoring of processes necessary to meet customer requirements and to demonstrate the processes continuing ability to satisfy its intended purpose. In case of non-conformance with the planned result, correction and corrective action are taken to ensure conformity of Services.

Corrective/ preventive action requests initiated by AL BASRA AL RAEDA COMPANY's personnel and input from customers shall be reviewed and considered as a contributing factor to changes or refinements to the ORGANIZAION's activities or IMS as Corrective and Preventive Actions Procedure.

6.1.5 CUSTOMER/CLIENT SATISFACTION MEASUREMENT PROCEDURE (BLC-IMS-P010)

- A. AL BASRA AL RAEDA COMPANY maintains a procedure to measure the customer satisfaction as per Procedure.
- B. AL BASRA AL RAEDA COMPANY obtains feedback from the customers after the completion of a job in a standard format to monitor the customer's perception of the degree to which their needs and expectations are fulfilled, what will be measured, monitored and analyzed for continuous improvements.
- C. Customer complaints are logged as non-conformances and treated in the same manner as AL BASRA AL RAEDA COMPANY own non- conformances, Key performance indicator KPIs are information used by AL BASRA AL RAEDA COMPANY , Investigation will be carried out to find the root causes and necessary corrective and preventive actions are taken to avoid recurrence and thus enhance customer satisfaction.
- D. The methods for obtaining and using this information include: -
 - 1. Recording customer complaints and customer feedback on delivered services and products provided
 - 2. Product rejections or returns;
 - 3. Repeat orders for product;
 - 4. Market share analysis and compliments;
 - 5. Warranty claims and dealer reports;

6. Customer survey through meeting and Site visit survey;
 7. Changing volume of orders for product;
 8. Trends in on-time delivery;
 9. Obtain customer scorecards from certain customers;
 10. Submittal of customer satisfaction surveys.
- E. The corrective and preventive action system shall be used to develop and implement plans for customer satisfaction improvement that address deficiencies identified by these evaluations, and assess the effectiveness of the results.

6.1.6 INTERNAL AUDIT PROCEDURE (BLC-IMS-P011)

- A) AL BASRA AL RAEDA COMPANY maintains a documented procedure (BLC-IMS-P011 Internal Audit Procedure) in which are defined all responsibilities for planning, conducting and documenting internal audits
- B) The procedure for internal Q&HSE audits, reviews and examine the activities that AL BASRA AL RAEDA COMPANY perform are properly reflected in written procedures, are performed in accordance with a specified plan which states on which activities an audit is to be undertaken, and when it is to be carried out to ensure, and the effectiveness of the overall Q&HSE program and to ensure:-
- i) The QHSE system is effectively implemented and maintained;
 - ii) Conforms to AL BASRA AL RAEDA COMPANY 's own requirements for its QHSE system;
 - iii) Conform to the requirements of the International Standards ISO 14001:2015, ISO 45001: 2018 and ISO 9001:2015.
- C) AL BASRA AL RAEDA COMPANY plans, establishes, implement and maintain and internal audit programme that includes the audit criteria, scope, frequency, responsibilities, planning requirements and reporting and methods.
- D) All departments within the Integrated Management System shall be audited at least once every 12 Months and the audit shall cover all Q&HSE aspects.
- E) The results from the previous audit shall be taken into consideration during the next audit.
- F) The Outsourced activities that impact the Q&HSE of the product, service and/or service related product and which are performed at the AL BASRA AL RAEDA COMPANY 's facility are included as part of the internal audit of the organization.
- G) Additional audits shall be conducted when significant organizational or procedural changes are made or as follow – up to verify the implementation of corrective actions and problems that are identified within the Q&HSE system.

Page 96 of 109

- H) The audit results shall be documented, will be reported to the relevant Management and filed along with possible non – conformance and recommended corrective actions.
- I) Senior Management shall review the result and conclusions of internal audits reports, including non – conformances and the relevant follow – up actions, during the AL BASRA AL RAEDA COMPANY Q&HSE management review meeting BLC-IMS-P004 as per to ensure continued effectiveness. The review shall ensure that objectives are being met, defects or irregularities found and corrective action taken to rectify any shortcoming.
- J) Performance of audits
 - a) Suitably trained personnel, following BLC-IMS-P011 Internal Audit who is not directly responsible for performing the activity or operation (must be independent of the area being audited), will perform the audit.
 - b) The results of the audits are documented on an Audit Summary Report and corrective action initiated where required by auditee / management of the area audited.
 - c) All processes of the quality management system required to meet this specification shall be audited prior to claiming conformance to the requirements of this specification.
- K) Audit review and closure:
 - a) AL BASRA AL RAEDA COMPANY identifies response times for addressing the detected nonconformities. The manager responsible for the area audited shall ensure that any necessary corrections and corrective actions follow the requirements specified and all the results of internal audits and the status of corrective actions taken shall be reported in the management review.
 - b) Records of internal audits shall be maintained (as per BLC-IMS-P002 Control of Record Procedure).

6.1.7 PROCESS EVALUATION

By maintaining databases and the suitable evaluation method AL BASRA AL RAEDA COMPANY is able to give Customer guidelines for use and be able to improve processes through procedures.

AL BASRA AL RAEDA COMPANY evaluates this process to achieve the planned results in conformity to the product service and / or service related product requirements.

The facility is provided for the customer to assess job performance after a job is done. In this manner it is possible to analyse how well customer' requirements are met on a continuous basis and if the planned results are not achieved, the management makes correction and corrective actions as appropriate.

ANALYSIS OF DATA AND EVALUATION (BLC-IMS –WI-06)

As per Analysis of Data Procedure, AL BASRA AL RAEDA COMPANY Determines, collects and analyses necessary data for effectiveness and continuous improvement of IMS. The data analysis is

Integrated Management System Manual (IMS)

Code

Page 97 of 109

relevant to but not limited to internal audits, management review, monitoring and measurement and the output of this analysis provides information related to :

- A) Customer satisfaction degree;
- B) The performance and effectiveness of the quality management system
- C) If the planning has been implemented effectively;
- D) Conformity to product / Service design requirements;
- E) Nonconformities and product failures identified after delivery or use, provided the product or documented evidence is available to facilitate the determination of the causes;
- F) Characteristics and trends of processes, products, services and/or service related product including opportunities for preventive action;
- G) The effectiveness of the action taken
- H) The need for improvement
- I) Supplier performance;
- J) Quality objectives and Statistics;
- K) HSE Statistics.

All these data analysis will be discussed during the management review meeting conducted every six months with the senior management, management representative and Function Head(s).

Improvement opportunities (if any) are identified based on above data during management review meetings and improvement team will be assigned by MD or The QA Manager.

The improvement team will brain storm and chalk out an action plan for the improvement activities. The action plan will be implemented by process owners in coordination with teams.

Statistical Techniques which can be referenced from Analysis of Data for the improvement of the effectiveness of the IMS.

6.1.8 MANAGEMENT OF CHANGE AND PLANNING FOR CHANGE / MANAGEMENT REVIEW PROCEDURE

As per BLC-IMS-P004 Management Review Procedure

General

The QA Manager or his Delegate shall maintain a procedure (Management of Change Procedure/Management review procedure) for the process of Management of Change,

Integrated Management System Manual (IMS)

Code

MANAGEMENT REVIEW (BLC-IMS-P004)

It is considered that a key area of management responsibility is to formally review the Integrated Management System at suitable intervals to verify that it is operating correctly and effectively and to evaluate the QHSE system's continuing suitability, adequacy, effectiveness and its alignment with the strategic direction of AL BASRA AL RAEDA COMPANY

This periodic review is essential to the continuous improvement process of the IMS and serves to demonstrate Management vision and commitment to all Employees & Clients.

This review shall include assessing opportunities for improvement and the need for changes to the quality management system, including the quality policy and quality objectives.

In order to conduct performance review indication, Managers shall:

- 1) Establish Annual Objectives and Targets
- 2) Hold periodic Safety Meetings
- 3) Collect Accident/Incident and ill health reports
- 4) Arrange a system for follow up reports
- 5) Implement a Safety Monitoring/Audit program
- 6) Regularly review HSE procedures against current Rules, Regulations and industrial 'best practices'
- 7) Develop Employees HSE & Technical Training program

The AL BASRA AL RAEDA COMPANY Management Director shall be responsible for providing advice on:

- ☐ Q&HSE Objectives & Targets for achievement
- ☐ Accident / Incident statistics
- ☐ Review of follow up reports
- ☐ Collation of Audit/Monitoring reports
- ☐ HSE & Quality training achievements
- ☐ Changes to Q&HSE Rules and Regulations

Performance indicators shall be reviewed on a regular basis at monthly, quarterly and annual intervals as indicated in the respective Terms of Reference for AL BASRA AL RAEDA COMPANY , Divisions Managers and Business Division Q&HSE Meetings.

Individual site Safety Meetings/Toolbox talks will consider Q&HSE performance & on job risk assessment information on a weekly basis.

The management review meeting will be conducted at least every 12 Month to review the continuing suitability and effectiveness of the Integrated Management System in satisfying the requirements of the **ISO 9001:2015 , ISO 14001: 2015 and ISO 45001:2018** standards as well as the **Q&HSE Policy Statement**.

The meetings will be chaired by the MD and attended at least by the Divisions Managers & the HSE &

Quality Advisors

6.1.14.1 MANAGEMENT REVIEW MEETING INPUTS REQUIREMENTS.

The agenda of these meetings will include the following topics for discussion (as inputs Requirements) :

- A) Health, Safety, Environment & Quality Policy and Objectives, goals and the needs and expectations of its clients;
- B) Changes that could affect the IMS, including changes to legal and other applicable requirements (such as industry standards);
- C) Analysis of customer satisfaction, including customer feedback and feedback from relevant interested parties;
- D) Effectiveness of actions resulting from previous Management reviews;
- E) The effectiveness of actions taken to address risks and opportunities
- F) Monitoring and measurements results
- G) Internal and External audit results;
- H) Results risks assessment of Q&HSE;
- I) Process Performance & review of the analysis of product Conformity, service and/or service-related products including non-conformities identified after delivery or use;
- J) Analysis of Supplier Performance;
- K) Non-conformities, Accident, Potential Hazards and Emergency Situations;
- L) Status of Corrective and Preventive Actions;
- M) Review and analysis of failure in service and/or service-related products.
- N) Training needs;
- O) Overall Effectiveness of the Integrated Management System and the changes that could affect the IMS;
- P) Areas of Continual Improvement and Recommendations or opportunities for improvements;
- Q) Legal & other requirements.
- R) The adequacy of Resources.

Prior to the management review meeting, the QA Manager will prepare summaries based on the above topics for discussion at the meeting. The QA Manager will record the minutes of the meeting and ensure that any nominated actions are implemented.

The MD may request additional meetings in consultation with the QA Manager at any time, if a matter arises which potentially has a serious effect on the Integrated Management System and its services of
AL BASRA AL RAEDA COMPANY .

CLAUSE 10:

6.1.9 CONTINUAL IMPROVEMENT

6.1.9.1 GENERAL

AL BASRA AL RAEDA COMPANY determines and select opportunities for improvement and implement any necessary actions to meet customer requirements and enhance customer satisfaction.

These shall include:

- A) Improving products and services to meet requirements as well as to address future needs and expectations;
- B) Correcting, preventing or reducing undesired effects;
- C) Improving the performance and effectiveness of the quality management system.

NOTE Examples of improvement can include correction, corrective action, continual improvement, breakthrough change, innovation and re-organization.

Quality policy, objectives, audit findings, data analysis, corrective/ preventive actions, management reviews , customer feedback etc. will be used as drivers to effect continual improvement of AL BASRA AL RAEDA COMPANY QMS Processes for the Production, Execution of the service, and use of service related products.

6.1.10 CONTROL OF NONCONFORMITIES BLC-IMS-P012

6.1.10.1 GENERAL

As per BLC-IMS-P012 Control of Nonconforming Products, service and Service-related product control Procedure.

The Quality Assurance Manager and Operation Manager or delegates maintain a documented procedure (as per BLC-IMS-P012 Control of Nonconforming Products, service and Service-related product Procedure.) to identify the controls and related responsibilities and authorities for addressing non-conformances cases.

- A) In case the non-conformance case has been identified during the product realization, during the servicing execution or service-related, controls should address:
 - a) Service, service-related product and / or Product realization to prevent unintended use or delivery,
 - b) Addressing the detected non-conformance,
 - c) Correction
 - d) Segregation, containment, return or suspension of provision of products and services;
 - e) Informing the customer
 - f) Corrections by Taking action(s) to preclude its original intended use, and

Page 103 of 109

- g) Obtaining Authorization for its use, release or acceptance under concession by relevant authority and / or by customer.
- B) In case the non-conformance case has been identified after delivery, controls should address:
 - a) Identifying, documenting and reporting non-conformances identified after delivery,
 - b) Ensuring the analysis of non-conformance or failure,
 - c) Taking action(s) appropriate to the effects, or potential effects of the non-conformance.

6.1.10.2 NON-CONFORMING PRODUCT

As per BLC-IMS-P012 Control of Nonconforming Products, service and Service-related product Procedure. The Quality Assurance Manager and the Operation Manager shall identify the disposition of the non-conformance.

- A) Repair or rework with subsequent inspection to meet specified requirements, or
- B) Re-grade for alternative applications, or
- C) Release under concession, or
- D) Reject and/or scrap.

6.1.10.3 NONCONFORMING SERVICE EXECUTION AND SERVICE-RELATED PRODUCT

AL BASRA AL RAEDA COMPANY addresses nonconforming service execution or service-related product by the following sequence of activities:

- A) By taking action to correct the nonconformity; or
- B) when 6.10.3.a) is not possible or appropriate, by taking action to preclude the use of service-related product from its intended use or application; or
- C) when 6.10.3.a) and 6.10.3.b) are not appropriate, by authorizing release or acceptance under concession by a Relevant authority and/or by the customer.

For nonconforming service execution, AL BASRA AL RAEDA COMPANY takes corrective action in accordance with 6.13 that is appropriate to the effects, or potential effects, of the nonconformity.

6.1.10.4 RELEASE OF NON-CONFORMING PRODUCT / SERVICING UNDER CONCESSION

The evaluation and release under concession of non-conforming servicing that does not satisfy manufacturing acceptance criteria shall be permitted when AL BASRA AL RAEDA COMPANY 's relevant authority and the customer have authorized the release, providing that it does not affect or contradict with the design acceptance criteria: A) If the products continue to satisfy the applicable DAC and/or customer criteria; or

Page 104 of 109

- B) The violated MAC are categorized as unnecessary to satisfy the applicable DAC and/or customer criteria; or
- C) The DAC are changed and the products satisfy the revised DAC and associated MAC requirements.

6.1.10.5 VERIFICATION AND DOCUMENTATION

When nonconforming services and/or service-related product are corrected they shall be subject to verification to demonstrate conformity to the requirements.

Records of the nature of nonconformities and any subsequent actions taken, including concessions obtained, are maintained.

6.1.10.6 CUSTOMER NOTIFICATION

The Quality Assurance Manager or delegate shall notify the customer of product / servicing and /or service related product non-conformance to contract requirements.

Records shall be maintained.

6.1.10.7 RECORDS

The Quality Assurance Manager shall ensure that all records related to non-conformances are maintained as per BLC-IMS-P002 Control of Records Procedure.

All non-conformance reports shall be analyzed at regular intervals and any trends highlighted and discussed during the AL BASRA AL RAEDA COMPANY Q&HSE management review meeting of the Q&HSE management system.

6.1.11 POST-DELIVERY ACTIVITIES

AL BASRA AL RAEDA COMPANY meets the requirements for post-delivery activities associated with the products and services. In determining the extent of post-delivery activities that are required

AL BASRA AL RAEDA COMPANY considers these following: -

- A) Statutory and regulatory requirements;
- B) The potential undesired consequences associated with its products and services;
- C) The nature, use and intended lifetime of its products and services;
- D) Customer requirements;
- E) Customer feedback through Business development team, customer complaint, requests, monthly, quarterly meetings meeting such as ROO etc.....

NOTE Post-delivery activities can include actions under warranty provisions, contractual obligations such as maintenance services, and supplementary services such as recycling or final disposal.

6.1.12 ACCIDENTS AND INCIDENTS INVESTIGATIONS BLC-HSE-P015

It is the responsibility of all Company personnel to ensure the prompt reporting of all Accidents, Incidents, Near Misses & unsafe condition/activity to management.

Prompt reporting of such information allows Division Managers, Site managers and Supervisors to correctly identify the circumstances of each event and select the appropriate level of investigation that might be required to be carried out.

The Company recognizes that prompt reporting and appropriate levels of investigation are essential to: Identify the Immediate and Underlying Causes

Prevent similar repetitions of the accident

Allow the identification of changes and improvements that may be required to the current HSE MS arrangements.

Division managers, Site managers and Supervisors are required to respond to all Accidents, Incidents, unsafe condition/activity and Near Miss reports in order to identify the facts surrounding each case.

No report of an Accident, Incident, unsafe condition/activity or Near Miss is to be treated as trivial

In the event of a report of an Accident, Incident or Near Miss, personnel are to follow the relevant instructions contained in the forms and the Procedure.

AL BASRA AL RAEDA COMPANY MS General Manager shall be responsible for collation and collection of statistical information relating to accidents that have occurred.

Team from the Q&HSE Department & the concerned Divisions are responsible for conducting the investigation. Q&HSE Department shall distribute reports of accident investigation findings and recommendations together with follow up actions, to the related Division Manager and the relevant personnel.

7. CORRECTIVE AND PREVENTIVE ACTIONS (BLC-IMS-P013)

7.1. CORRECTIVE ACTIONS

As per BLC-IMS-P013 Corrective and preventive action Procedure.

A) A corrective action system has been established to detect and correct any condition, which causes or may cause non-conformance in on-site services and repair/maintenance equipment, this corrective action is to eliminate or to minimize the likelihood of its reoccurrence and shall be appropriate to the effect of the non-conformity.

If required as part of the corrective action, necessary revision is done to the documented manual, procedure, instructions, forms etc.

B) A documented Corrective action procedure BLC-IMS-P013 includes: -

Page 106 of 109

- a. Reviewing the process of nonconformities including the customer complaints and Investigations of the source to determine and implement corrections after identifying the root cause of the non-conformity to eliminate the causes to prevent occurrence on subsequent occasions.
- b. Analysis of non-conforming products, services and quality related documentation to determine and eliminate potential causes and to reduce the likelihood that a Non-Conformity reoccurs.
- c. Evaluate the need for action to eliminate the cause of the nonconformity, in order that it does not recur or occur elsewhere, by:
 1. reviewing and analyzing the nonconformity;
 2. determining the causes of the nonconformity;
 3. determining if similar nonconformities exist, or could potentially occur;
- d. Implementing the actions needed.
- e. Identifying the timeframe and the responsible person for addressing corrections and corrective action.
- f. Ensuring and reviewing Suitable controls to ensure that corrective actions are taken and that they are effective
- g. If necessary, MOC (as per BLC-IMS-P004) when the corrective actions requires new or changed controls within the quality management system.
- h. Update risks and opportunities determined during planning, if necessary;
- i. Maintaining records of the correction and the corrective action taken
- j. The recording and implementing of procedural changes resulting from corrective actions.

7.2 PREVENTIVE ACTION BLC-IMS-P013

As per BLC-IMS-P013 Corrective and preventive action.

- A. Preventive action as per documented Preventive Action procedure BLC-IMS-P013 shall be implemented as appropriate when information is obtained from process and work operations which affect product quality, audit results, quality records and customer complaints, to detect, analyse and eliminate potential causes of non-conformities.
- B. Preventive action shall be applied as above and investigated for root cause analysis. Once the cause has been determined, preventive measures shall be applied and the effectiveness reviewed at an appropriate time.
- C. Identifying the timeframe including any immediate or short time action required and the responsible person for addressing the preventive action.
- D. Ensuring and reviewing the effectiveness of corrective and preventive measures is reviewed as required under Management Review BLC-IMS-P004 Procedure.

8 SAFETY INSPECTION PROGRAM

8.1 PURPOSE

To ensure that safety inspections are routinely performed to identify the presence of unsafe acts and conditions, and then achieve any necessary corrective measures.

8.2 APPLICABILITY

This procedure applies primarily to managerial/supervisory personnel, but individual employees shall also inspect/assess their work areas and methods.

8.3 POLICY

Compliance levels with applicable standards and owner and client requirements will be monitored through regularly scheduled inspections.

8.4 RESPONSIBILITY

Top Management / QAM or his delegates shall ensure that a comprehensive inspection program is implemented and maintained for his or her respective projects.

8.5 PROCEDURE

8.5.1. TYPES OF INSPECTIONS

8.5.1.1. Executive management inspections (as needed) shall be performed to identify the compliance levels with applicable requirements. An inspection report will be sent to the responsible project manager and the associated division manager.

8.5.1.2. Safety Audits shall be performed and documented periodically. Audits may be performed by the Company Safety Officer or his designated representative. The Safety Officer is responsible for ensuring that all items from the Audit that "Need Action" have been addressed.

8.5.1.3. Supervisory Self-Inspections (primarily general employee awareness) shall be performed by the foreman permanently or temporarily assigned to a work area/operation.

Special inspections shall be conducted by individual project managers or designees that address:

- A) A special request from executive management
- B) Installation of new equipment
- C) Establishment of new procedures
- D) Relocation or revision of operations
- E) Other modifications

8.5.1.4. Technical inspections requiring unique expertise shall be conducted as required and coordinated through project management. Examples include: crane certifications, specialized fire protection equipment inspections/certifications, industrial hygiene surveys.

8.5.2. UNSAFE ACTS/CONDITIONS - REPORTING & ACTION

8.5.2.1. Individual employees shall "report" any unsafe acts or conditions to their immediate supervisor.

8.5.2.2. Supervisors upon discovering or being informed of an unsafe act or condition shall implement corrective measures.

8.5.2.3. An employee may contact the project manager if he/she is not satisfied with his/her supervisor's response to the identified safety concern.

8.5.2.4. In instances where (life threatening) imminent danger is identified, the person identifying the situation shall implement immediate proper positive controls to prevent injury or damage.

8.5.2.5. In instances where (life threatening) imminent danger is identified, the project manager shall be immediately notified.
