AL BASRA AL RAEDA

**Expertise Beyond Measure,
Results Beyond Expectations**

AL BASRA AL RAEDA COMPANY

Integrity in Every Barrel, Accountability in Every Project

MISSION

We pledge to provide our clients with superior construction services and deliver these services in a professional, reliable, responsive and friendly manner. We will initiate and maintain regular contact with our clients throughout the construction and warranty period to insure they remain completely informed and have as much input, as they desire.

We strive to provide the highest quality customer experience by staying true to our guiding principles of Quality, Trust, and Accountability

VISION

To be a leader and contractor of choice in the construction industry, recognised and valued for its uncompromised commitment to safety, integrity, quality, innovation and client satisfaction.

CEO's Message

Since our inception, we have strived to deliver excellence in the field of construction and engineering, and I am honored to lead a team of dedicated professionals who share this vision. Our journey has been marked by a relentless pursuit of innovation, quality, and customer satisfaction.

We understand that every project we undertake holds significance in shaping the dreams of our clients, and we approach each endeavor with utmost commitment and dedication.

In a rapidly evolving industry, we remain steadfast in our commitment to embrace the latest technologies, sustainable practices, and industry's best practices. Our focus on safety, quality craftsmanship, and timely project delivery sets us apart and earns us the trust of our clients.

As we move forward, we will continue to adapt and evolve, driven by a passion for excellence and a vision of creating a better tomorrow through our construction and engineering solutions. Our mission is not just to meet expectations but to exceed them, every single time.

I extend my heartfelt gratitude to our clients for entrusting us with their projects and to our team members for their unwavering dedication and hard work. Together, we will continue to shape the landscape of possibilities and build a brighter future for generations to come.

Yours Sincerely
CEO

Services

We offer Wide range of Services including but not limited to the following;

Engineering, Planning, Procurement, Construction, Installation, Commissioning, Maintenance, and Operation & Maintenance (O&M) works for industrial facilities (buildings and warehouses), pipelines, gas systems and networks, oil and gas production facilities and refineries.

Civil and construction works, concrete and steel structures, scaffolding works (manufacturing, installation, dismantling, and supply of scaffolding materials and equipment),

Excavation and earthworks, Roadworks and site preparation, steel fabrication and forming.

* **Plumbing and firefighting works.**

Electrical generator works (design, installation, testing, operation, periodic maintenance, and repair) for main and standby power systems.

Electrical works and power distribution, overhead transmission lines and underground cables, lighting and power systems, grounding and lightning protection works.

Fire alarm systems, gas detection and security systems,

Heating, Ventilation and Air Conditioning (HVAC) works.

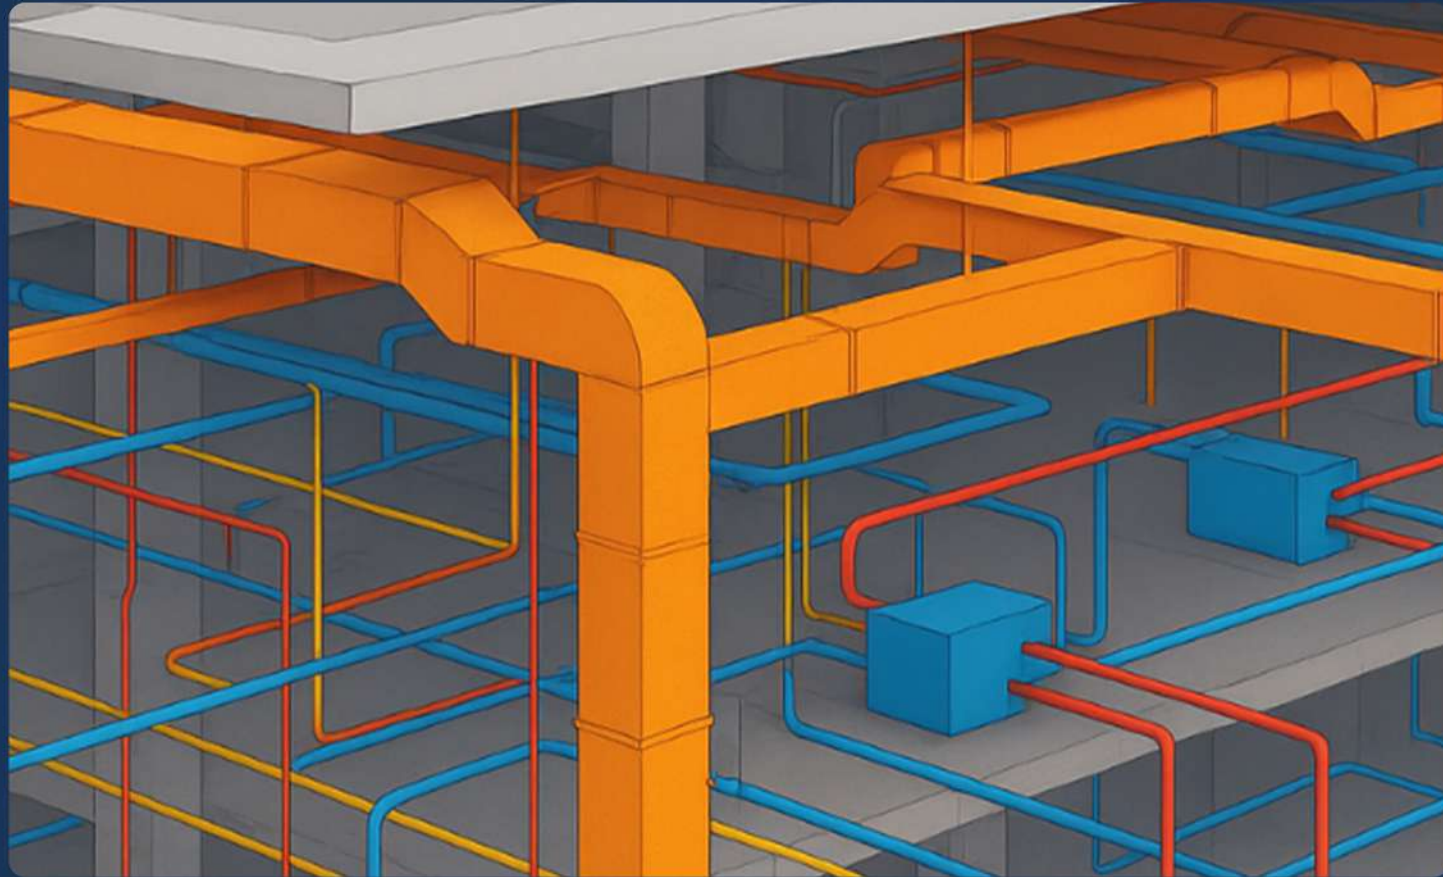

Mechanical, Electrical, and Plumbing (MEP) works,

Construction equipment and machinery rental services.

* **Manpower supply and mobilization.**

Design Engineering Services

We provide a personalised service in Design and Engineering for Industrial facilities, pipelines, gas systems and networks, oil and gas production facilities and refineries as we have the experts in all the disciplines involved in all-in project management. So, it is there for you at every stage of the project life cycle, from the feasibility study to the design, construction, start-up, operation and maintenance of the installations.

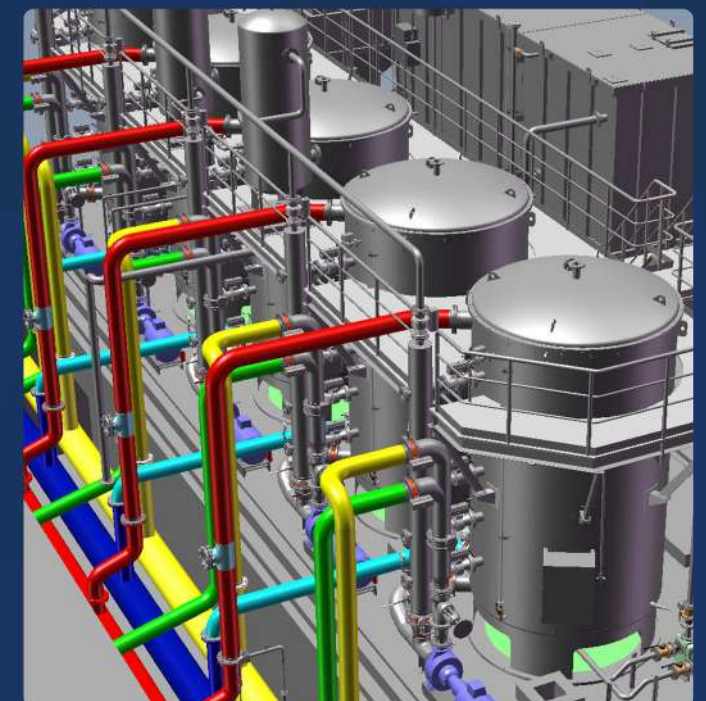

We carry out multidisciplinary engineering projects in terms of Design and Construction, taking part in all Project Stages: Design, Basic, Detail and Manufacturing Engineering including but not limited to the following;

- ✓ Feasibility and Preliminary design studies
- ✓ Conceptual and basic engineering, FEED.
- ✓ Professional construction and assembly services
- ✓ Assembly and construction cost estimate
- ✓ Bracketing and spooling

- ✓ Quality control and traceability
- ✓ Pre-commissioning, commissioning and start-up
- ✓ Detail engineering, from conceptual design to manufacture
- ✓ Piping: 3D modelling of piping (BIM scale model), for interference analysis and the automatic obtaining of isometrics, plant drawings, support book, lists of material...
- ✓ Structure: Advanced structural analysis and calculation of steel and concrete constructions. Design, definition and calculation of bolted joints.
- ✓ Civil: Calculations for foundations, retaining walls, reinforced concrete slabs and concrete structures, with the deployment of matrix and/or finite element programmes and latest generation.
- ✓ Electricity: Implementation drawings, single-wire diagrams, interconnection diagrams, Luminotechnical calculations and design, Data sheets, Lists of cables, lists of electrical signals.
- ✓ Instrumentation: Index of Instruments, Instrument Location Drawings, Measurement and Control Loop Diagrams, List of Materials (Equipment, Instruments, Mechanical and Electrical Materials), List of Signals, Instrument Interconnection Diagram, Control Diagrams, Hook up.

Steel Structure Fabrication and Installation

Steel Structures Fabrication, Supply and Installation Services form the core of modern construction, combining strength, precision, and innovation.

We deliver steel solutions that redefine durability and design. From fabrication to flawless installation, every detail reflects quality and expertise.

At **AL BASRA AL RAEDA Company**, every stage — from fabrication to installation — is guided by precision engineering, strict quality control, and a commitment to safety. We design and manufacture a wide range of steel structures — from heavy industrial frames to architectural steelwork. Using state-of-the-art machinery, our skilled fabricators ensure every component meets your project's specifications with millimeter accuracy.

Our certified installation teams ensure your steel structures are assembled safely, efficiently, and in full compliance with engineering standards. From on-site welding to bolting and alignment, every stage of installation is managed with precision for various sectors including:

- * **Industrial Facilities**
- * **Commercial Buildings**
- * **Warehouses and Logistics Center**
- * **Oil & Gas Projects**
- * **Power Plants and Infrastructure**

Pipeline Fabrication and Installation Services

We specialize in pipeline installation services for various industries, including oil and gas, water treatment, chemical processing, power generation, and construction. Our skilled team offers comprehensive solutions for the installation of both underground and above-ground pipelines, ensuring that each system is securely and efficiently installed to meet safety, compliance, and operational standards. With years of experience in pipeline installation, we provide tailored services for new sizes and complexities.

We use advanced machinery to dig trenches of varying depths and widths, while minimizing disruption to surrounding areas. Our team provides professional pipeline welding and fabrication services, using techniques such as TIG, MIG, and stick welding to join pipes and create custom fittings. This ensures that your pipeline is leak-free and meets all engineering specifications.

Hydrostatic Testing: After pipeline installation, we conduct hydrostatic testing to ensure the pipeline's strength and leak resistance. This involves filling the pipeline with water under pressure to check for potential weak points or leaks, ensuring the pipeline is safe for operation.

Pipeline Coating & Corrosion Protection: We provide pipeline coating and corrosion protection services to enhance the lifespan and durability of your system. Our coatings help prevent rust, corrosion, and environmental damage, increasing the operational efficiency and safety of your pipeline.

Pipeline Inspection & Maintenance: We offer pipeline inspection services to check for wear and tear, leaks, and any other issues that could affect pipeline performance. Our team can also provide regular maintenance services to keep your pipeline operating smoothly.

Pipeline Relining & Rehabilitation: If your existing pipeline is showing signs of wear or damage, we offer pipeline relining and rehabilitation services to restore its functionality. We use advanced techniques to repair and reline damaged pipelines without the need for costly replacements.

Utility Pipeline Installation: For municipal and industrial utilities, we install utility pipelines for water, sewer, electrical, and gas services. We ensure that these pipelines are installed efficiently, comply with local codes, and are capable of handling the required load and pressure.

Emergency Pipeline Repairs & Installations: We also provide emergency pipeline installation and repair services for urgent situations, such as gas leaks, water main breaks, or pipeline damage caused by external factors. Our rapid-response team is available 24/7 to minimize disruptions and restore services quickly.

HVAC Supply and Installation

Our focus has been on the following activities:

- * Detailed engineering of HVAC & R systems;
- * Procurement aimed at purchasing components for HVAC & R systems;
- * Construction of customized HVAC & R machinery, in accordance with international standards;
Cold Room, Freezer room and dry storages;
- * Construction of metal air ducts in accordance with national, European and American regulations;
- * On site assembly and HVAC system start-up;
- * Installation of thermal, acoustic and fire insulation;

We are into design and installation of industrial and centralized HVAC service. Technically sound and experienced engineers and draftsmen in our team provide totally customized HVAC solutions based on architectural planning of a building. Our goal is to provide clients with precise solutions to their heating and ventilation needs.

HVAC Supply and Installation

The all-round and comprehensive HVAC installation and maintenance service that we provide, covers the following aspects:

- * HVAC or air conditioner installation
- * HVAC or air conditioner maintenance
- * Mechanical servicing of the system
- * Looking after the system's entire electrical aspect
- * Taking care of the plumbing part of the system

Our experienced technicians can install any model of HVAC systems Supply, Installation, testing and commissioning of Package Units/ AHU/FCU, DX Type Split units. Chiller unit, VAV Units, VRF Units & Chiller Water Pumps Supply/ Fabrication and Installation of HVAC Rectangular & Spiral Single and double skin Ducting by G.I, CS, SS & Pre insulated Ducting (PI Duct) with accessories as per G 90, ASHARE & SMACNA Standards DW 143 & 144

Fiberglass Insulation, Mineral Wool, Polyurethane Foam types of Insulation and Aluminum Cladding work on Ducting & chilled water Piping Installation & Testing of MS, BS, CS and HDPE Supply / Installation of Exhaust Fan Roof Top Industrial Fans, Gravity Ventilators & Fresh Air Fan Pressurization Units. Supply and Installation of Volume Control Damper/ Motorized Volume Control Damper Fire Damper/ Back Draft Damper, Sand Trap Louver/ Supply and Return Air Grille & Diffuser/ Exhaust Grille/ Diffuser and Pressure Relief Damper Supply, Installation, testing and Commissioning of Direct Digital Controller (DDC Panel/ HVAC control) system Interlocking of DDC Panel with fire alarm control panel, SCADA, STEAM HUMIDIFIER Testing Commissioning and Air Balancing for HVAC system

MEP (Mechanical, Electrical, Plumbing) Services

We offer design, installation, and maintenance of mechanical, electrical, and plumbing systems in buildings and construction projects in Oil and Gas, power, industrial construction sector.

Design: Our MEP contractors design the mechanical, electrical, and plumbing systems of a building based on the specific needs of the client and the building's function.

Implementation: Once the design is finalized, MEP engineers oversee the implementation and installation of the systems.

Maintenance and Repair: These are responsible for maintaining and repairing the mechanical, electrical, and plumbing systems of a building to ensure their longevity and efficiency.

We Cover Variety of Sectors including oil & gas plants and facilities, technological buildings, healthcare facilities, sports facilities, education and culture establishments, commercial buildings, hotels and industrial facilities

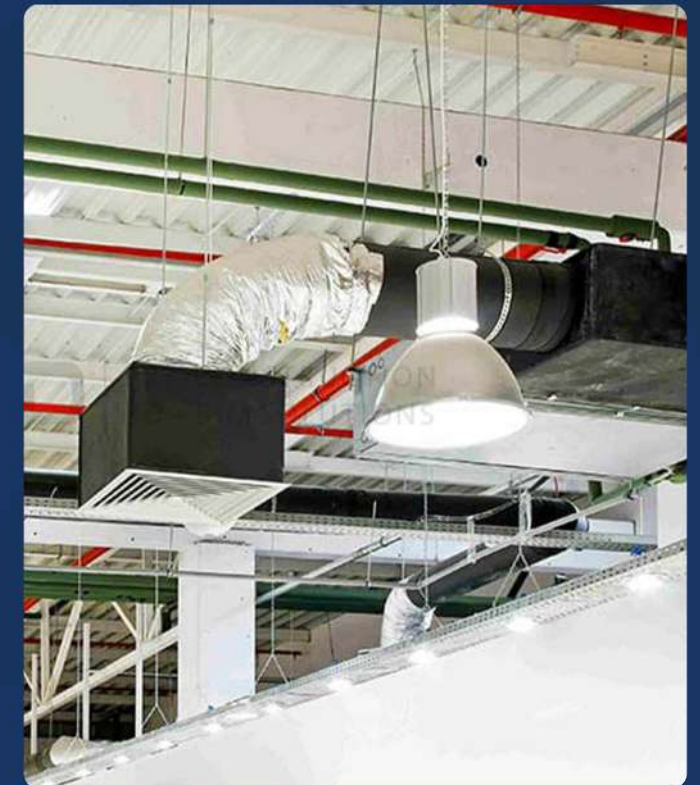

ELECTRICAL

- Power distribution & wiring
- Lighting systems
- Fire alarms & security systems
- Renewable energy integration

PLUMBING

- Water supply & drainage systems
- Sewage & wastewater management
- Gas piping (where applicable)
- Rainwater harvesting & storm-water systems

Civil and Infrastructure Construction Services

We have a well-trained and professional team with high experience and reputation in designing and implementing civil works. The company has all the necessary equipment and supplies to perform civil works in the highest quality and safety according to Global Standard Specifications

Civil and Infrastructure Construction Services

- Our Civil works services including but not limited to :
- Complete Wellpad Construction, building foundations, Piling and concrete works
 - Access Roads & Rig Tracks with geogrid stabilization and culvert crossings
 - Concrete Foundations & Structural Works for separators, wellhead skids, shelters
 - Drainage Systems including bund walls, culverts, concrete channels, and slope protection
 - Pipeline Trenching, Bedding & Backfilling (manual or machine excavation)
 - Industrial Fencing, Chain-link Barriers & Safety Perimeters, Berms, security gates, T walls, and other concrete structures
 - Civil Support for Tank Pads, MCC Rooms, and Equipment Yards

Civil and Infrastructure Construction Services

We construct state-of-the-art buildings (concrete, steel structure, pre-fabricated) including commercial and industrial building, accommodation buildings, warehouses, workshops, shades with the highest quality. Our experts are always looking forward to find ways to achieve the highest level of sustainability through an environmental friendly methods of construction. We add value to each of our projects by combining our vast arrays of experiences within the Iraq region to deliver projects on time and on budget.

Road Construction:

We offer a wide range of services for all your road construction needs. Our expertise spans various types of projects, including large government roadworks and smaller private developments. Some of our key services include:

Road Resurfacing and Repairs: Maintaining smooth and safe roads is essential. We handle resurfacing projects with precision and attention to detail, ensuring road safety and comfort.

Asphalt Paving: Our expert team works with state-of-the-art asphalt paving technology, ensuring a durable, weather-resistant road surface.

Concrete Works: Concrete paving solutions for highways, city roads, and industrial projects. We specialize in high-strength concrete that can endure heavy loads and extreme conditions.

Sealant Application: We provide services like polysulfide and polyurethane sealant applications to ensure that roads are protected from wear and tear.

PQC (Pavement Quality Concrete) Cutting: For precise and efficient concrete cutting, ensuring that every project is done to the highest standards

Electrical and Instrumentation Services

We excel in Electrical and Instrumentation (E&I) services, providing comprehensive solutions for industries such as civil construction, transportation, oil & gas, green energy, resource, and heavy industrial sectors. Our expertise spans installation, calibration, commissioning, and maintenance of electrical systems and instrumentation, ensuring optimal performance and reliability.

We provide the full range of E&I engineering, procurement, construction and Installation services, commissioning and maintenance including:

- | | |
|--|----------------------------------|
| Overhead power lines | Lighting systems |
| * Power distribution | * Instrumentation process |
| * Substations (6.6 kv, 11kv, 132 kv, 400kv) | * Piping and tubing |
| * Power plants including solar power | * Lightning protection |
| * Conduit and cable tray | * Lighting and receptacle |
| * Cable installation | Safety Instrumented System (SIS) |
| * DCS & PLC | * Substations and MCCs |
| * Electrical and instrument controls | * Temporary power distribution |
| * Fiber optic | * Cathodic protection |
| * Grounding | * Fire and gas |
| | * UPS systems |
| | Video surveillance and security |

Electrical and Instrumentation Services

Power Plant Construction:

We provide turnkey solution including engineering, procurement, construction and commissioning to ensure the power plant operates safely and reliably under all conditions, in accordance with the terms of the EPC contract.

We offer turnkey Solar Power Plant (SPP) solutions, covering the entire engineering, procurement, and construction (EPC) process to deliver reliable and high-efficiency systems.

Instrumentation Services

Our experienced team provide specification preparation, supply, commissioning, installation, integration, project management, test & calibration of:

Pressure, Temperature, Flow and Level Transmitters
Gauges and Switches
Flow Meters
Limit Switches
Sensors
Customized solutions

Supply and Installation of Switches, Transmitters, Pressure Gauges, gauges for temperature flow, level application and control valves, breather valves, on/off valves, safety valves, junctions boxes, panels, laying and termination of cables, pedestal fabrication, perforated cables tray work.

Supply and Installation of systems such as DCS, PLC, SCADA, hazardous area control, Gas and Fire. We also do installation, termination, and commissioning for indicators, controllers and transmitters, and valves among other instruments of the field.

Automation and Control Systems

We provide expert services for the design, installation, and maintenance of automation and control systems. Our solutions are tailored to enhance the efficiency and productivity of your operations.

Key Services:

Programmable Logic Controller (PLC) Programming
Distributed Control Systems (DCS) Integration
Supervisory Control and Data Acquisition (SCADA) Systems
Human Machine Interface (HMI) Configuration
Process Control Optimization

Fire Alarm, Fire Fighting and Security Systems

Our team of experts will design and implement the best solution to protect your people and business assets.

Services:

- Fire sprinkler system design & installation
- Fire suppression system design & installation
- Fire alarm system design & installation
- Inspections & maintenance services
- Budgeting projects
- FM-200 & CO2 Fire Suppression
- Fire Alarm Systems
- Fire Protection Maintenance & Repair
- Building Information Modeling (BIM)

We have the expertise and manpower to provide industry-leading fire protection for commercial facilities. From engineering to layout, and installation we deliver the right solutions specific to even the most challenging environments.

CCTV & Access Control Systems

Given the strategic importance and sensitivity of Oil & Gas installations, comprehensive surveillance systems like CCTV and access control are integral.

These systems not only fortify security, deterring unauthorized access, but also complement fire safety mechanisms, offering visual insights during emergencies and facilitating informed decision-making.

QUALITY, HEALTH & SAFETY

Health, Safety and Environment Policy (HSE)

This policy addresses the Health, Safety and Environmental risks to our operations, and the potential impact on our operations; and the potential impact on our host7 communities and staff; with strong management commitment at the highest level. This policy reflects good working practices and shall be made mandatory.

Therefore, it shall be our policy to:

Continuously pursue the goal of no harm to people and the environment
Manage HSE matters as any other critical business activity.

Promote a culture in which all employees share this commitment.

The implications of this policy are that:

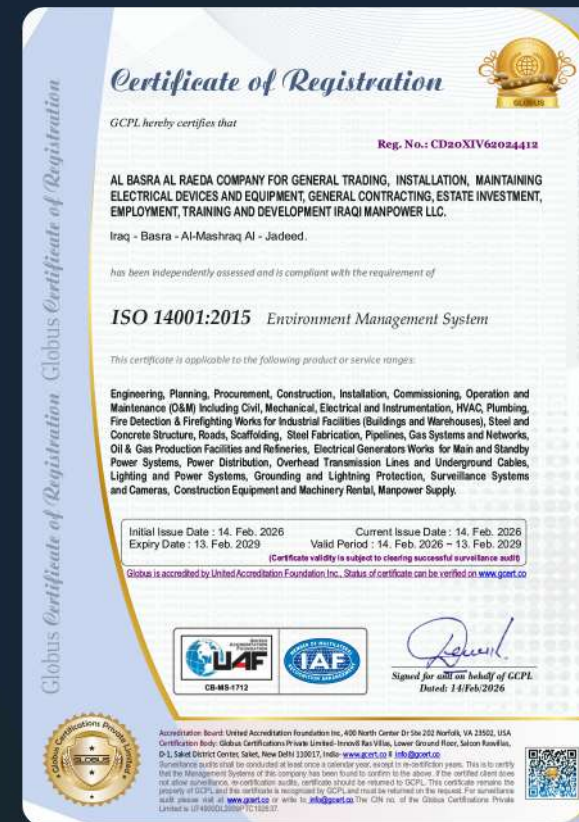

All activities shall be analyzed to systematically identify related hazards, risks and sensitivities and to deal with consequences should they arise.

Continually assess environmental impact and reduce it to a level as low as practicable.

Include HSE performance in the appraisal of all staff and reward accordingly.

As HSE remains the responsibility of each and every one of us, every employee and contractor employee must plan and perform his work in accordance with this policy, this policy shall be a high level document, clearly understood by all staff, distributed to all

policy.

QUALITY STATEMENT POLICY

It is our policy to provide Clients with products and services which conforms to all specified requirements in a cost effective and timely manner.

For us, Quality is one of the most important means for achieving the objectives of our engagement. The concept of quality includes all aspects and features of a product or service having the purpose to satisfy Client requirements and expectations.

We have established a Quality system based on ISO 9001, Quality System Model for Quality Assurance in Design/Development, Production, Installation and Servicing. All procedures, documentation and practice, in all areas, are equipped to meeting the requirement of this international standard.

The achievement of these quality Objectives and, as a consequence, of the basic objective to keep on operating, as a competitive and successful Company, depends on the quality of personnel, on the adequacy of organization, on commitment to work and, above all, on everybody's attitude to the problem of quality.

All personnel have the responsibility, the authority and organizational freedom to identify and evaluate quality concerns and to initiate solutions. The workers are committed to continuous improvements of quality and are encouraged to be actively involved in defect prevention and early detection and elimination of non-conformances.

The Quality Assurance and Quality control department acts independently from other departments with the QA/QC Manager as head. The Manager of QA/QC function has got the necessary authority and freedom of initiative to check that the Quality System is correctly implemented and to propose and start any corrective action whenever deemed necessary.

The QA/QC Manager has the support of the Top Management to ensure, by any means that the Quality Policies outlined in this Quality Manual are fully implemented and that proper development and improvement programs are prepared, put into effect and monitored.

List of Equipments

1. Scaffolding & Working at Heights Systems

S.No	Equipment Description	Quantity
1	Galvanized Steel Scaffolding	1400 Tons
2	Cuplock System Scaffolding	250 Tons
3	Frame & Layer Scaffolding	250 Tons
4	Fittings Scaffolding	200 Tons
5	Cantilever Scaffolding	80 Tons
6	Suspended Scaffolding	80 Tons
7	Mobile Scaffolding Towers	30 Tons
8	Aluminum Scaffolding	10 Tons
9	Prefabricated Quick Assembly Scaffolding	30 Tons
10	Standards 3 m	1200
11	Standards 2 m	1200
12	Standards 1.5 m	1200
13	Ledgers 1.2 m	2400
14	Ledgers 1.5 m	2400
15	Ledgers 1.8 m	2400
16	Ledgers 2.5 m	2400
17	Transoms 1.2 m	2400
18	Transoms 1.5 m	2400
19	Transoms 1.8 m	2400
20	Transoms 2.5 m	2400
21	Braces 3 m	1800
22	Metal Platforms & Decking Systems	400
23	Guardrails & Toe Boards	200
24	Safety Nets	10
25	Base Plates & U-Head Jacks	2844
26	Clips & Couplers (All Types)	200000
27	Forklifts 3 Tons	2
28	Forklifts 5 Tons	2
29	Forklifts 10 Tons	2
30	Telescopic Forklifts 10 Tons	1
31	Material Hoists 5 Tons	3
32	Scissor Lifts & Boom Lifts 10 Tons	3

2. Excavation & Trench Support Equipment

S.No	Equipment Description	Quantity
1	Trench Shoring Systems	6 Sets
2	Hydraulic Support Systems	8 Sets
3	Steel Trench Boxes	10 Units
4	Sheet Piles	120 Tons
5	Soldier Beams	40 Units
6	Excavation Edge Protection Systems	12 Sets
7	Dewatering Pumps & Accessories	14 Units

3. HVAC Equipment

S.No	Equipment Description	Quantity
1	Industrial Air Conditioning Units	12 Units
2	Chillers	4 Units
3	Cooling Towers	3 Units
4	Split & Package AC Units	60 Units
5	Ventilation Systems	15 Sets
6	Air Extraction Systems	10 Sets
7	Duct Fabrication Equipment	1 Workshop Set
8	Refrigerant Charging Units	6 Units
9	Refrigerant Recovery Units	4 Units
10	Air Balancing & Testing Devices	5 Sets

4. Electrical & Power Generation Equipment

S.No	Equipment Description	Quantity
1	Cable Pulling Machines	6 Units
2	Cable Reel Stands	10 Sets
3	Cable Termination Tools	15 Sets
4	Panel Installation Equipment	8 Sets
5	Electrical Testing Devices	12 Sets
6	Grounding Resistance Meters	4 Units
7	Thermal Imaging Cameras	3 Units
8	Diesel Generators	12 Units
9	Temporary Power Distribution Systems	8 Sets
10	Lighting Towers	10 Units
11	UPS Systems	6 Units
12	Power Cables	15 km

5. Civil Works & Rehabilitation Equipment

S.No	Equipment Description	Quantity
1	Concrete Mixers	10 Units
2	Concrete Vibrators	25 Units
3	Rebar Cutting Machines	6 Units
4	Rebar Bending Machines	6 Units
5	Soil Compactors	12 Units
6	Water Pumps	15 Units
7	Welding Machines	20 Units
8	Surveying Instruments (Level / Total Station)	6 Sets
9	Concrete Cutting Equipment	8 Units
10	Surface Preparation Machines	10 Units
11	Painting Equipment	18 Units
12	Sandblasting Equipment	6 Sets

6. HSE Equipment

S.No	Equipment Description	Quantity
1	Personal Protective Equipment (PPE)	350 Sets
2	Multi-Gas Detection Devices	12 Units
3	Firefighting Equipment	30 Sets
4	Confined Space Equipment	6 Sets
5	Rescue & Emergency Equipment	5 Sets
6	Scaffolding Inspection & Tagging Systems	20 Sets

7. Training & Skilled Workforce

S.No	Resource Description	Availability
1	Scaffolding & Working at Heights Training Programs	200 Available
2	Electrical & Site Safety Training	30 Available
3	Occupational Safety Programs	20 Available
4	Scaffolding Engineers & Inspectors	12 Personnel
5	HVAC Technicians	18 Personnel
6	Electrical Technicians	22 Personnel
7	Civil Engineers & Supervisors	16 Personnel
8	Certified Welders	25 Personnel
9	Skilled & Unskilled Labor	180 Personnel
10	HSE Officers & Fire Safety Specialists	10 Personnel
11	Painters	28 Personnel
12	Welders (Additional Field Welders)	20 Personnel
13	Steel Fixers / Structural Fitters	18 Personnel
14	Carpenters	24 Personnel
15	Blacksmiths / Fabricators	15 Personnel
16	Pipe Fitters	20 Personnel
17	Drivers & Equipment Operators	26 Personnel
18	Training Instructors	6 Personnel
19	Administrative Staff	18 Personnel
20	Engineers (All Disciplines)	22 Personnel
21	Project Coordinators	12 Personnel
